Fordson

MORE and more every day the demand for the Fordson Tractor increases because the Fordson has demonstrated so much usefulness, so much economy, so much labor saving, so much money saving, along so many lines of activity. The farmer has discovered that not only for plowing, harrowing, discing, seeding, mowing, reaping and threshing, but a multitude of other uses; cutting wood; feed; grinding feed; churning, washing; furnishing water in the house; making electric light possible in the house and around the barns; so that as a matter of fact, there is hardly an hour of the day when the Tractor cannot be made a profitable servant. There is ditching to do; there are roads to fix; and so on all down along the line of the numerous calls that constantly face the farmer the Fordson steps in and does the work, shoulders the complete burden of the toil and the hard work, one might almost say "drudgery."
