BROADENING TELEPHONE SERVICE.

Every local telephone user is vitally interested in the condition and service of the Bell telephone system, which on this coast is represented by the Pacific Telephone company.

The recent annual report by the president of the associated telephone companies, known as the American Pacific Telephone and Telegraph company, through which all long distance connections from this section are made.

The standards of the Bell system in instruments, apparatus and methods are standard the world over. The United States is given the cheapest, the best, and the most widely utilized telephone service of any country in the world.

Wm. Fritz, who has been ill for the past week is now under quarantine for smallpox.

33,162,000 or a total of over twelve billion for the year. This is an increase of 2,700,000 a day over the daily average during 1919.

There were 231,316 employees in the associated companies at the close of the year. The wire mileage totals 25,377,404.

There are sometimes aggravations in local conditions of service, but telephone users should know and appreciate the vastness of the facilities at their service and the need that the company be not hampered in its further developments along needed lines.

CEGAR AND VICTORY

A farewell party was given at the home of Mr. and Mrs. H. A. Curry Wednesday evening in honor of Mrs. M. B. Frank, who is leaving to join her husband at Valseit, Oregon.

A very successful evening was held at Cliff church Tuesday evening when a large number gathered to enjoy the stereopticon pictures, lecture and program.

The social which was announced to be given by the Methodist Ladies Aid for March 18 has been postponed until March 25.

FARMERS SAVE \$25,000. Farmers Mutual Fire Insurance is Best.

Farmers are finding out that insurance in the Farmers Mutual Fire Relief association cost 60 per cent less than in Commercial companies.

It is stated that the facilities of the ether for the simultaneous sending of numerous telephone messages are so limited that the ether itself can carry but a small part of the enormous volume of the telephone traffic required by the entire world.

In order to reduce the interference in the ether and to provide the maximum opportunity for communication for mobile and other stations which cannot use wires, it has been proposed to limit the use of international radio telephony to cases where telephonic communication by any other means is impossible.
