Supply and Demand
Regulate the Price
of Lumber

Right now the demand is far in excess of the supply and is sure to be more noticeable next spring.

4,000,000 Homes are Needed in the United States

About 40 Homes needed in Gresham

These will be built and this means a great demand for lumber and naturally the price will increase.

(1) America's forests are gradually being depleted and the distance between the remaining forests and the saw mills is becoming greater each year.

(2) It is only reasonable to expect lumber prices to advance. Decide to own a home. Place your contract while prices are at rock-bottom.
