THE MONARCH DUPLEX draft safeguards your baking and your cooking and insures uniform heating. No half-burned coal or charred wood with the Monarch Range. Any fuel burns to a clean fine ash.

Monarch ranges are made of malleable iron, not cast iron, because malleable iron can be made thinner and therefore gets to a heating point that much quicker. Malleable iron permits the use of riveting hammers. Neither bolts nor stove putty are used in Monarchs. That's why they stay tight. The Monarch features are ones which we are desirous of demonstrating to you. There are other important quality and value points in Monarchs which you should investigate in person.
