ELECTRICAL HOUSEKEEPING
 Eight hours is insufficient time for human hands to perform all the household tasks. However, it is possible to establish the eight hour day in the home by making use of the electrical hands that are offered to you in the form of the electric dishwasher, washing machine, ironing machine, vacuum sweeper and the many other labor-saving devices.
 These untiring "household assistants" will do your work quickly and efficiently. Your home can be run systematically with these electrical hands for they never disappoint you or grow tired. Your time and energy can be devoted to the better things in life, when you keep house electrically.
 Glad to show you any time.

Read your instruction book It says—

Old oil should be drained from the crankcase at regular intervals and replaced with fresh oil.

This statement is made because engine operation causes road dust, carbon, fine metal particles and other impurities to accumulate in the crankcase oil. The gritty oil circulates through the engine, impairing its performance, and ultimately leads to rapid depreciation and repairs.

These careful instructions from the manufacturer are often disregarded; cleaning the crankcase is a job generally disliked.

To meet this need Modern Crankcase Cleaning Service has been established by first-class garages and other dealers co-operating with the Standard Oil Company. These garages and dealers use Calol Flushing Oil,—the scientific agent that cleans out old oil, dirt, grit and other impurities and does not impair the lubricating efficiency of fresh oil used. The cleaned crankcase is refilled with the proper grade of Zerolene.

Look for the garage or dealer displaying the sign shown below,—it means "Better operation and longer engine life."
