# Fordson

The Fordson tractor was made to meet the demands and necessities of the everyday American farmer. It was made with the thought that it was the necessity of the man with forty acres as well as the man with one thousand acres. It was made not only for plowing, harrowing, discing, drilling, seeding, mowing, reaping, but for all the work on the farm where power is necessary. It was made to bring conveniences to the farmer's home as well as for the cultivation of his fields. It was made to furnish the power for the cream separator, silo filling, cutting feed, sawing wood, furnishing power for milking, washing, supplying the house with running water, electric lights, and the hundred and one things on the farm. It was made to do all this economically and in a reliable way. It was made to be the big profitable servant on the farm.

And remember, when you buy a Fordson Tractor, we are right here to keep that tractor in reliable running condition every day. You won't have to wait if anything should get out of order. We are right here to keep it right, because one of the conditions of the Fordson Dealer is that he must keep on hand always a complete supply of parts. This is a guarantee we don't believe you can get with any other farm tractor. Come in. Let's talk it over.
