Fordson

There are many Tractors clamoring for the patronage of the farmer. The very air is charged with the noise of claims. One would think that all the farmer had to do was to buy a Tractor and he would enter into the Millennium.

Well, consider this fact—there are a great many different makes of Tractors. Tractors have been on the American market for twenty years. In that time some three hundred thousand Tractors have been sold to the farmers in the United States. The Fordson Tractor has only been on the market two years, and in that time more than one hundred thousand Fordson Tractors have been sold to the farmers of the United States.

Two and two make four. Two and two always will make four. If the Fordson Tractor had not delivered more good work, more satisfactory work, more economical work, than any other farm Tractor, it would not have sold in the ratio of anywhere from five and more to one. "The proof of the pudding is in the eating." The proof of the superior merits of the Fordson Tractor is in its larger sale and use.

Now why not have a Fordson right away? Take up the subject with us. Come in and get the details, and all the particulars. It is only a matter of time until you buy a farm Tractor—that's sure. So don't put it off when it means money to you to act promptly.
