**NOTICE — Our Policy:**—In buying merchandise, is to get that which we would want to buy ourselves, in other words when we go into the market, we place ourselves in the same position as our customers. We ask the question 'would we want to buy that quality ourselves?'

That is the reason for our quality merchandise—we don't want to please the eye alone—we want every customer to have the same satisfaction in their mind while they are wearing the article as they have when they are buying it.

A great many have come to appreciate this fact. **QUALITY FIRST and THEN PRICE**,—is the secret to a satisfied mind when fulfilling your own desires for a good personal appearance.

### ELECTRICAL HOUSEKEEPING

Eight hours is insufficient time for human hands to perform all the household tasks. However, it is possible to establish the eight hour day in the home by making use of the electrical hands that are offered to you in the form of the electric dishwasher, washing machine, ironing machine, vacuum sweeper and the many other labor-saving devices.

These untrifling "household assistants" will do your work quickly and efficiently. Your home can be run systematically with these electrical hands for they never disappoint you or grow tired. Your time and energy can be devoted to the better things in life, when you keep house electrically.

Glad to show you any time.

## Fundamental Resources

Oregon is endowed by nature with many soils and many resources. She is fundamentally sound in her institutions and firmly entrenched in her possession of the basic essentials of life and happiness. From her mountains and plains, her forests and sea coast, spring those things that are needed by the world. Prosperity, like the tide rises and ebbs, but the wealth of this state is the wealth that endures and cannot be long depreciated by surface influences. This bank has dealt for 15 years with those engaged in developing the fundamental resources of the state, and has confidence in the strength of the land and the enterprise of her people.
