Two auto loads of Gresham people made the trip to Mt. Hood Lodge on the north slope of Mt. Hood Thursday, returning the same night. Of Interest to Farmers

There are a good many reasons why a farmer should have a bank account, among them these five:

1. Because the farmer creates wealth and the banker conserves it.
2. Because the farmer often needs money or credit to supplement his own efforts.
3. Because the farmer's money in the bank is not only safe, but is helping the community.
4. Because the farmer, being in reality a business man, should be business like in his methods.
5. Because by being a bank customer, the farmer is really entitled to the advice, information, and cooperation that every good banker can give.

We really want to help you.
