

Our's Is a One Price Store

We need not tell you what our answer is to the common questions of new customers, "Can't you sell this for Less?" It's merely a matter of explaining that we don't do business that way—that no customer can obtain a less price than any other. Isn't it best when you can step into a store knowing that every value is good and that no item is over-marked?

RELIABLE BATTERIES FOR LOW PRICED CARS

The three principal cars owned by the man of moderate income have been made more efficient at the same time that their prices have been reduced. Not only has the cost of the motor itself been cut down, but a new battery, which gives it greater range of power, has been marketed for these sturdy, moderate-priced cars.

This battery is the product of the Philadelphia Storage Battery company. It is known, and patented, under the name of the Philadelphia Diamond Grid Battery. Its salient features are its Diamond Grid construction and Quarter Sawed Hard Wood Separator plus a whole year's guarantee of continuous performance.

There has never been any question, since the demonstration of the utility of Dodges, Fords and Buicks, as to their desirability.

With the new battery, built as a result of the increased efficiency gained by the engineering experience of the trained staff of the Philadelphia Storage Battery company, these machines can eliminate the disappointment of uncertain starting and lighting.

C. E. Osburn is the local agent for this remarkable improvement in motordom.

The regular communication of Gresham Chapter O. E. S., will be held on Tuesday evening, October 4 in the Masonic hall. All Eastern Star members are urged to be present as the Matrons of Portland and vicinity will put on a Floral degree.
