Farm Land Values Increase 55%.

Although Oregon farm lands have increased only 15.9 per cent in area in the last ten years, their value has jumped 55 per cent in the same period, from \$528,243,782 to \$818,559,751.

This is brought out in a statistical report which has been prepared for use at the Pacific Northwest Fruit Exposition which is to be held in Seattle from November 21 to 26.

The greatest increase in the farm value is the result of the growing use of mechanical methods in fruit culture—which, in Oregon, is practically synonymous with agriculture. The report shows that farm machinery during the decade increased 214.8 per cent, while buildings were jumping 102.8 per cent in value and the actual land only 42.4 per cent.

THE KIND OF FUNDS TO TAKE ON YOUR TRIP

SOME tourists take their funds in forms of credit that make trouble for them by delays that occur in obtaining cash, by the time it takes to have the credits paid and by the fact that they can be paid only during banking hours and only at banks.

You can avoid such troubles by taking the safest, handiest form of travel funds—"A. B. A." Cheques; that is, the Cheques which are recommended by the American Bankers Association, composed of 20,000 of the leading banks of the United States and Canada.

We are a member of this great association of bankers and have been authorized to sell
