WILL WE ALL MAKE OUR OWN GOLD?

Our high school boys have been told that the atom is the base of all matter, of all substance. It is an indefinitely small critter, this atom, but everything in the world, and the world itself, are built up of it, fabulous numbers to every cubic inch. But nobody has ever yet penetrated to the heart of an atom; it is still a riddle.

Now you wouldn't think that such an insignificantly tiny thing as an atom would worry anybody, but it actually does worry the world's greatest financiers, especially our own Wall street millionaires, because—

Scientific chemistry is getting to know too much about that said atom! The chemists are solving its riddle. Within ten years they have cleared up many of its secrets and the prediction is freely made by learned scientists that in another ten years they will have learned the structure of the atom and will be able to make any element desired at will.

If they learn the exact composition of the atom they will be able to make granite or coal, tin or rubber, lead or—yes, gold!

On the other hand, the man whose wealth is in land, buildings and live stock, will get off easier.

Near East American Workers Stick. "American workers are sticking to their posts in the Near East against the greatest of odds," said J. J. Hand-saker on his return from a summer in relief work in Armenia. "They declare they will not leave until every child in Armenia is cared for. Last year for a time we were obliged to put our orphanages on half and quarter rations, and thousands of our children died. When I was in Armenia last summer the children were in rags, some had practically nothing on, others wore grain sacks or flour sacks. Then it was warm, but as Mount Ararat towers above the country, I realized that before long those rags will be of no use, and they must have warm clothing."

Notice is hereby given that, pursuant to order of the Honorable George Taswell, Judge of the Circuit Court of Multnomah County, Oregon, Probate Department, I was on the 19th day of June, 1920, appointed guardian of the Estate of Ernest Ray Thompson, insane. All persons having claims against the said estate will file the same with me or with my attorney on or before six months from this date.

OREGONIANS IN NEAR EAST WORK

"Aid for the Armenians and other sufferers in the Near East is necessary only because war still rages in the Near East," says W. E. Rambo, who, with Mrs. Rambo has recently returned from Asia Minor.

"When we read of the battles now being fought by Greeks and Turks, we think of burning villages, of fleeing

MR. W. E. RAMBO

mothers, of crying children, their only place of safety an already overcrowded American orphanage.

"The Rambos were absent from their home in Baker about two years while they were in charge of an orphanage at Harounie near Tarsus, the home of Saul, the great Apostle. The orphanage was under fire for several days and finally Mr. and Mrs. Rambo and the other Americans made their way by night through a storm to the railroad, on which they took their children to Mersine.

"It is a matter of great pride to us that we were able to bring our children through without the loss of a single child," said Mrs. Rambo. "Our

MRS. W. E. RAMBO

kiddies were just as attractive and dear to us as any we have ever seen in this country, except of course our own."

After the Rambo's time of service was up and they were waiting for a ship for America, word came that the war had left thousands of Greeks stranded at Batoum, across the Black Sea. They immediately volunteered for further service and spent weeks in caring for the refugees and loading them on vessels furnished by the Greek Government.

Queen Sophie of Greece, to show her appreciation of the work of the Rambos and others of the Near East Relief workers, recently sent an appreciative letter and also a check for a substantial amount to the Near East Relief.
