THE UNITED STATES OF BRAZIL TODAY

Continued from page 1
mounting to the heights that crown the beautiful bay, in order to draw from the beautiful sunshine, a renewal of their vigor.

The native Brazilian, "the Indian" of the coasts, inland plains, and forest bordered rivers who lived in the country before Portuguese possession, has left no traces of civilization comparable with that of the Incas or pre-Incas of the northwest of South America, or with the culture of the Maya of Central America and their pupils and conquerors, the Aztecs. Only in the northern part of Brazil along the Amazonian river highway are there remains of ceramic art and weaving skill, which denote marked attainments by a people with settled homes and defined social habits.

Even to the present day the Amazon Indians have preserved their skill in weaving native fibres. They are sold on the Amazon for various prices ranging from fifty to several hundred milreis. Further south the Indian seems to have been of a different origin, who's cradle is assigned by some historians to Paraguay, and who are identified with the fierce Caribs, invaders of the West Indian islands and destroyers of the gentle aborigines of those shores before the Spanish made their discoveries and settlements. These Indians are very similar to our North American Indian and portray many of the same characteristics. The Indian problem is one of great importance not only to Brazil but to other South American countries. So far the government has taken little action for their education and betterment in social life.
