Be a Good Neighbor

Well-painted houses and well-kept homes make a more desirable neighborhood in which to live.

Good paint is an economy as well as a sign of thrift. It stops depreciation and increases the value of your whole property. The paints we handle have stood the tests of time and wear.

Other goods to make your spring cleaning easier:

- Mops, Brooms and Brushes
- Galvanized and Fibre Pails
- Step Ladders in several sizes
- Winchester Tools to get those odd jobs done
- Winchester General Utility Oil for cleaning, polishing and preventing rust.

GRESHAM LOCALS

Miss Helen Baker of Centralia is visiting her sister, Mrs. G. Schanno. Miss Baker has been attending school at Bellingham but she expects to return to Centralia to her parents after her visit here.

The Gresham Grange will not go to Evening Star next Saturday as was planned. The third and fourth degrees will be put on at Gresham Grange at the next session.

Mrs. Albert Camplin of Portland was a recent visitor at the home of Mr. and Mrs. Milliken.

Mr. and Mrs. C. E. Gilbertson of Seattle spent the week-end with E. D. Raker and family. Mr. and Mrs. Gilbertson are on their honeymoon.

Joe Peak, the nice looking boy who waits on you at Aylsworth's is sick with a cold.

Mr. and Mrs. Auger of Portland were visiting at the home of Mr. and Mrs. W. B. Parsons last Sunday. Mrs. Parsons is having a light attack of grip but is feeling better.

Floyd Mack has just completed installing a radio receiving apparatus in his office. Greshamites are becoming ardent radio fans. Rumors are abroad of others who are considering the purchase of similar equipment.

In planning the last story hour for this spring at the Gresham Library, Miss Peck decided to give an animal party for the young people. They spent a part of the afternoon indoors looking at animal books. The remainder of the time they played ring games on the lawn. All the children showed how much they enjoyed it by the merry laughter which could be heard as they danced and played.

B. F. Bentley has installed a new gasoline pump in front of his place of business. He handles oils and greases.

Mr. and Mrs. Roy Kern of Mt. Angel visited on Sunday with the former's parents, Mr. and Mrs. M. D. Kern.

Mrs. Mayme Boyle of Portland, formerly of Gresham, was a business visitor in Gresham one day last week. Mrs. Boyle was on her way to Estacada where she has a class in piano.

Mr. and Mrs. Cecil Metzger have moved from their former home on Fourth street to that of the latter's mother, Mrs. Nellie Gullikson, where they will stay temporarily. Mrs. Carrie Hansen and Miss Mary Hansen will occupy their new property at once.

The May bake sale of the W. C. T. U. will be held at Cecil Metzger's grocery on next Saturday, beginning at 2 o'clock. It is expected that a large variety of viands will be displayed, including home cookery and salads. The meeting of the union which was held last week at the home of Mrs. John Brown was well attended and the program proved to be of special interest. Several new members were enrolled. Mrs. Brown had her rooms beautifully decorated with spring blossoms.

Elaborate plans are under way for the country fair and bazaar to be given at the Grange hall on Thursday afternoon and evening, May 11 by the Ladies' Guild of Bethel Baptist church. Interesting exhibits will be shown and booths of various kinds will display articles which will be for sale. A splendid program for the evening will end the day. Fuller details will be given in a later Outlook.

Guests at the C. E. Rusher home on Sunday were Miss Elsa von Wintzingerode, a former teacher in the high school here and Miss Nellie Paris, both of Portland.

John H. Hall, property owner and for many years a resident of this section, was a visitor in Gresham on Saturday. Mr. Hall is out for the nomination as joint senator for the fourteenth senatorial district. He was accompanied by Geo. N. Woodley who is seeking the nomination as representative from Multnomah county.

Robert Glenn, the 23-months-old son of Mr. and Mrs. C. G. Schneider, is suffering from a green stick fracture of the left arm sustained when he fell on the floor yesterday.

Mr. and Mrs. H. C. Larsen have returned from their trip to Florida and report a most enjoyable vacation. Mr. Larsen went a few weeks ago and returned with his wife who had spent the winter there.

RADIO DEMONSTRATION IN GRESHAM, MAY 5

Are you "hooked up" with the world? Radio laughs at isolation. Are you interested in wireless? Friday evening, May 5, at the Gresham Grange hall an expert engineer in radio, J. C. Hallock, will explain and assemble simple radio outfits such as are within the reach of modest purses and ingenious fingers. Mr. Hallock has been connected with radio work for the past 15 years. He was at one time a government expert in radio.

W. C. Hefton of the Portland Railway Light & Power company has been co-operating with the Grange in presenting this opportunity to learn about simple wireless that will help to make farms and villages more attractive places in which to live.

Come and learn about radio telephone receiving outfits that will help you to know what is going on in the world.

MANAGEMENT OF THE MUTUAL FUND.

(This is Number Seven of a series of special articles published by the First State Bank, Gresham, Oregon, by permission, approval, and upon information furnished by its New York correspondent, the National City Bank of New York, the largest bank in the world today.)

A good Banker will study the interests of his patrons, for his business will grow with theirs. The profits of a bank are made upon its deposits, rather than upon its capital; for the latter is relatively small—its main purpose being to serve as a margin of protection to the depositors. The idea that bankers, as a class, have interests diverse from or in conflict with the interests of their patrons or the general public is wholly erroneous, and arises from a view of only one side of their relations with the public. It comes from thinking of them only as money-lenders, overlooking the fact that the funds they have to lend are placed in their hands by the public, and that the supply and demand for these funds are both increased by general prosperity.

When the relations of a Bank to its patrons as set forth herein are fully understood it will be seen that many of the criticisms directed at bankers are made without consideration for the facts. They assume a freedom in the use of the funds which the banker does not have, and usually they disregard the fundamental conditions under which the business must be conducted. (To be continued in the next issue of the Gresham Outlook.)

The First State Bank has always held that the interests of its customers were paramount with a customer every transaction with a customer must be handled as it would have its own hand. In the matter of loans or investments for a customer, they must have the same careful attention and security that the bank itself would demand, for by so doing only can the bank avoid an indirect financial loss and that still greater loss so essential in all business and especially in the banking business—loss of confidence by the bank's customers in the ability of the bank to properly conduct its business.—Adv.

HIGH SCHOOL NOTES

By H. S. REPORTER.

Last Friday on the local grounds union high school baseball team won from Vancouver high school 5-0. Winters and Quesinberry, acting as our battery, showed up to very good advantage. Vancouver gathered but one hit off Winters in the nine innings and only one error was made by the local team. Troeh pitching for Vancouver was touched up for six safeties. Winters struck out 10 men and Troeh 11.

Owing to May day exercises at Canby high school yesterday, union high played baseball, losing 5-3. We claim no allbi as Canby out-played and out-hit us. They were faster on bases and took more advantages of their opportunities. Inability to hit when hits meant runs was the downfall of union high in this game. We meet Canby again on the local grounds and are expecting a hard game.

The track captains for the different classes have been elected for the meet that is to be held soon. They are: freshman, Thomas Lovelace; sophomore, Henry Lunday; junior, Barleigh Quesinberry; senior, Richard Satterstrom.

On May 26, a declamatory contest will be held in the assembly hall at 1:15 p. m. The contest will be divided into three different divisions, oratorical, dramatical and humorous. Three students from each class will be chosen by the class advisors to compete. After the contest a game of baseball will be played with Washougal.

The May day pageant that was scheduled for May 12, will be given on May 10 because of the eighth grade examinations which occur on May 11 and 12. The pageant is of a historical nature and is causing much interest. All patrons are urged to attend.

The tennis court is being worked on every day. The ground will be ready for games in about a week. Mr. Campbell, who is an experienced tennis player will have charge.

Union high is fortunate to have among its teachers one who knows the butcher's trade. Mr. Shagren gave an excellent demonstration of the value and quality of the different kinds of cuts of meat. A half pig of the agriculture boys was used to demonstrate. Mr. Shagren gave many interesting points on the value, price and quality of different cuts of meat.

Friday evening, April 19, the Home Economics club gave a party to the agriculture boys. The farmers were cleverly entertained by the farmerettes with a variety of stunts known only to farmers. A good time was enjoyed by all.

The Latin classes accompanied by their teacher, Miss Farnsworth, enjoyed a hiking trip up the Sandy river last Saturday. A large camp fire was built and each member had to cook his or her own lunch over the fire. A splendid afternoon was spent.

Miss Waite, former science teacher here, visited the school recently Mrs. Waite, who left a few months ago on account of ill health, was a welcome visitor and we are glad to report her health to be much improved.

It was hoped that Miss Hurd, who had to leave on account of the illness of her mother, would be back again, but a telegram from her states it is impossible for her to come this year. Her mother passed away recently.

Notice!

There will be a service in Japanese in the Free Methodist church at Gresham on Wednesday, May 3, at 7:30 p. m.

As this will be the last service for the season a general rally is desired. Our American friends also are welcome.

A. YOUNGREN.

Regular meeting of Gresham Lodge No. 125, I.O.O.F. in the Odd Fellows hall, every Thursday evening. Brothers welcome. CLARENCE STANLEY, N. G. C. A. HILL, Secretary.

GIRLS' STATEMENT WILL HELP GRESHAM

Many women will profit by the following statement of one of their sex: "I was afraid to eat on account of stomach trouble. Even rice did not agree. After taking Adler-I-Ka I can eat anything. Adler-I-

ka acts on BOTH upper and lower bowel, removing foul matter which poisoned stomach. EXCELLENT for gas on the stomach or sour stomach. Guards against appendicitis. It brings out poisonous matter you never thought was in your system. Gresham Drug Company.—Adv.

Why Friction and Washboard Methods Are Out of Date

There were several steps in the development of successful machine washing, such as is now made possible by the THOR cylinder washer. The first was the discovery that water itself has solvent power, and that by adding to it certain substances, this power, especially over dirt and grease, is still more effective. Primitive housekeepers added wood ashes to the wash water, but found that while this lye "cut" the dirt, it was too hard on the clothes. To lessen such bad effects, they combined lye with fat—and thus originated modern soap.

The second step was a clearer understanding of textiles and of the way in which dirt and grease are absorbed and retained by the various fibres of which textiles are made. Under the microscope cotton and linen appear like strings or ribbons of cells, while wool shows as over-lapping fish-scales, which are found to expand when wet and which if rubbed while wet or subjected to hot water, at once interlock, thus shortening the fibre and resulting in what we call "shrinkage." Now what we call "soil" in clothing is insoluble particles of dirt held suspended among these fibres by the waste oil given off constantly by the human skin. This oil, or grease, must be "cut" or attacked so that the dirt particles may be set free from fibres and carried away in the wash water.

In other words, it is necessary to be convinced that to successfully cleanse clothing we must use those methods which will most effectively dissolve grease, and thus permit the dirt to fall away from between the fibres of the clothing. Modern science has proved to us that such methods are purely chemical reactions—and that grease is best removed, not by rubbing, but by treating it with those substances which have been found to literally dissolve it and change it into other forms. All grease is combinations of fatty acids—and we must use the opposing chemical elements, or alkalis (such as washing soda, ammonia, borax, etc., or variations of them as found in soap), in the wash water in order to break up the grease and permit the real dirt to detach itself from the clothing. (To be continued.)

We Welcome Small Accounts

A bank account like anything else must have a beginning. The size of the first deposit is not of special importance; a strong determination to add to it regularly is what counts.

Many a large fortune developed from the smallest kind of a start.

It is for this reason that we welcome the small account with the same degree of cordiality as we do the large one.
