Gresham Fire Department to Be Controlled By City.

A special meeting of the city council was held last Wednesday evening to take some definite action in regard to the Gresham fire department. The meeting was called after the blowing of the siren Tuesday night had started Gresham people. The fire summons was only intended as a signal for fire drill but it continued to blow so long and so loudly that everyone thought the city must be on fire.

The council appointed the city fire and water committee, composed of A. F. Hammar and T. R. Howitt to prepare a set of rules and regulations concerning the management of the fire department and present same at the next council meeting.

Heretofore the council has had no control of the fire department or the appointing of its officers. From now on the fire chief must have the sanction of the city council before he can assume his office.

Marie Fisher, Park Rose; Mrs. Maud Rudd, Corbett; Mrs. Elizabeth Schneider, Gresham; Mrs. Mary Spencer, Troutdale; Mrs. P. R. Whiteside, West Portland.

PLEASANT HOME

Thirty young people were invited to a party at the home of Mr. and Mrs. Grant Sloop last Friday evening. It was intended as a surprise party on Arthur Sloop but when the party arrived at the house it was found that the honor guest had gone away from home to spend the evening. Everyone, however, declared they had a splendid time. Arthur came home about 10 o'clock. When the guests were preparing to go home it was discovered that the lights on the autos wouldn't work. Some one had tampered with them.

The Methodist Ladies' Aid served dinner and supper to the election board at Pleasant Home. Dinner was served at the home of Mrs. M. Lennartz.

Members of the Pleasant Home Baptist and Methodist churches and the Cottrell community church held a meeting last Sunday afternoon at the home of Mrs. D. D. Jack and outlined arrangements for a "Go-To-Church Sunday" on May 28. Plans were formulated to canvas the community to see that everyone receives an invitation to come to church on that day. An interesting program has been arranged which is printed elsewhere in this issue. The plans include two services at each church during the day.

About 35 people got busy and put a fence around the cemetery. They worked all day and accomplished a wonderful amount of work. They mowed the cemetery and hauled the grass away. They made play out of the work and enjoyed it. Stumps had to be cleared away to make a fence line. A woven wire fence was put up on the north and east side. There was enough left over for another side but not enough posts so that will have to be the work of some future occasion. There was a good turnout of men in spite of the busy season. Some of the people came all the way from Sycamore to help. A number of women also came to help with the dinner. The girls appreciate very much the help received and the unexpected response when everyone were so busy. Even the weather man was kind and furnished a good day.

Plans for the daily vacation Bible school are well under way. School will commence on June 5 and continue for two weeks to June 16. It will be held at the Baptist church.

Gresham musical lovers have a rare treat in store Wednesday when the Portland Ad Club Quartet make their appearance at the Gresham Theater.—Adv.

Cow Gives 35 Tons Milk in Seven Years. "Willowmoor White Pride" is a pretty big name for a cow, but the O. A. C. station Ayrshire of that name seems doing her best to deserve it as she gave an average of some two quarts a day for 45 years. In seven years she has produced 8180 gallons of milk—enough to fill the swimming tank at Shepard hall. If a man had credit with his local milkman for that amount he could draw a quart of milk twice a day for 45 years and never get a milk bill. The edible solids in the 35 tons of milk she gave are equal to the edible solids of 30 fat steers averaging 1250 pounds each. And for good measure Willowmoor produced seven heifer calves in the same seven years, each of which, says P. M. Brandt, head of the station dairy department, is capable of duplicating her mother's record—except possibly the heifer calf production. Be sure your bees have a permanent supply of water near the apiary. This is especially important in the spring. Measure your success as a beekeeper by the average yearly production of honey from your colonies, and not by the number of swarms you get. Learn to prevent swarms.—O. A. C. Experiment Station. Farm Reminders. To prevent loss of ammonia from manure either land plaster or superphosphate can be used to advantage by putting a handful of the material in the gutter behind each animal once a day. Superphosphate contains both phosphorus and land plaster, hence is of more value to the land. Hydrated lime or ground limestone should never be used with manure as they hasten the loss of ammonia.
