**Brenlin**  
the long-wearing window shade material

Be sure the window shades you buy won't crack and break!

Ordinary window shade material is made of coarse muslin which is filled with chalk and clay. The wear of daily usage causes this filling to loosen and fall out, leaving the shade full of cracks and pinholes.

But Brenlin wears and wears

Brenlin is made of fine, closely woven cloth which contains not a particle of chalk, or clay, or other filling.

It wears and wears. Hangs smooth and straight. No cracks, no pinholes deface it!

Tinted with the finest, fast colors Brenlin Window Shades will not spot in the rain nor fade in the sun. They wear three times as long as ordinary shades.

Come in and see the many rich colorings we have in this long-wearing shade material. Let us show you how little it will cost to shade your windows with Brenlin, and help you select just the tone that will harmonize with the color scheme of your room. Come today.
