ADVERTISING Rates reasonable. Our representative will call.

Official paper of the Town of Gresham Official paper of the Town of Fairview

Entered as second-class matter March 2, 1911, at the Postoffice at Gresham, Oregon, under the Act of March 3, 1879.

A NATION'S GREATNESS. Righteousness exalteth a nation; but sin is a reproach to any people.—Prov. 14:34.

The strike of railroad employes has begun, many thousands of men, mostly shop workmen, have walked out. Later maintenance of way and other departments may be involved. While they may be hampered to some extent, the railroads claim their service will not be greatly curtailed.

It is a fine tribute to the refined taste of the ladies on the committee and to enterprise of the local librarian that Gresham won the first place in display of roses at the rose exhibit in connection with the rose festival. It brings a measure of glory and prominence to the locality that makes us all feel glad. This accomplishment should inspire our confidence to undertake other things equally worthy.

Much Money Goes to England.

The Postoffice Department has announced that there has been a great increase in the last two months in the amounts of money sent to England by postal money orders. During May the total was 110,000 pounds or \$495,000 at the rate of exchange then in effect. The amount going to England daily now is said to be about 5,000 pounds or \$23,000 at present rates of exchange. While much of the money sent abroad is directed to relatives, the bulk of it, the department stated, is in exchange for exports to this country.

CAREFUL CROSSING CAMPAIGN NOW ON.

The interest of all automobile owners has been enlisted in the four months nationwide "Careful Crossing Campaign" through which the American Railway association is now seeking to prevent highway accidents at grade crossings, involving railroad trains, vehicles and pedestrians. The campaign began June 1 and will continue for four months. This movement is similar to the "No Accident" campaign conducted by the railroads last year which resulted in a remarkable decrease in grade crossing accidents. The solution to the problem of prevention of accidents is thought to be largely a matter of educating drivers of automobiles, both as to the hazards and as to the necessity for exercising caution. During the last four years ending December 31, 1921, 2755 automobiles were damaged or destroyed, 208 people were killed and 921 injured according to statistics compiled by R. J. Clancy, assistant general manager of the Southern Pacific.

The cause of these accidents was found to be pure carelessness which may be remedied by the exercise of proper judgment on the part of drivers of automobiles. In other words, before attempting to cross the tracks of a railroad, drivers of automobiles should stop, look in both directions and listen, and while waiting for train to clear a crossing where there is more than one track, should make sure that a train is not approaching from the opposite direction on some other track. Such precaution at the most would rarely require a wait of more than 60 seconds.

Surface Cultivation Brings Results.

Frequent shallow surface cultivation of garden and truck soils is an excellent practice for conservation of soil moisture. It is almost equally effective in keeping down many serious insect pests.

Harem Veil Makes Its Appearance

The latest novelty from Atlantic City is the Harem Veil, worn, they say, as a protection for milady's little nose against the freckle-making sun.

SHOULD GUARD AGAINST FIRES.

The Outlook is in receipt of the fifth annual report of State Fire Marshal A. C. Barber for the year ending March 31, 1922, in which he states the unusual conditions of last year made the fire losses hard to combat. "Incentive has been strong for incendiary fire, and carelessness is a hard thing to curb." The state fire marshal says there were 111 cases of investigation of suspicious fires, resulting in 19 arrests, nine convictions and ten confessions, with several cases pending. During the year 11 lives were lost and 24 serious injuries resulted from fires. The property loss was greater than the previous year.

In reporting the causes of fires, it seems that carelessness of smokers and carelessness in the use of matches is a leading cause, with defective flues, rubbish and sparks, a close second.

From other sources comes a more general report of present fire conditions.

The forest fire situation is critical over most of the Pacific Coast, according to bulletins received today by the Western Forestry & Conservation association, the clearing house for all western protective agencies. While high mountain regions have the advantage of late snow disappearance this spring, May and June were abnormally dry and woods conditions have reached a danger point earlier than usual. Already slashing fires have caused heavy losses. Unless rain falls in a few days bad fires in green timber are expected and should there be wind the situation may get beyond control. Appeals are being made to all persons in the woods to use extraordinary precaution with campfires, matches and tobacco, and to refrain from burning slashings. The fire laws are being enforced rigidly, nine convictions having already been secured.

Washington has suffered worst, having already had over 200 fires with an estimated loss of \$750,000 and two lives. Two fires were caused by moonshine stills. Little mature timber was affected, being moister, but nearly 50,000 acres of young growth was injured while 15 or 20 million feet of logs were burned, with logging equipment worth \$350,000, railroad property amounting to \$100,000, and residences or property of settlers totalling \$140,000. About 300 patrolmen are now being maintained co-operatively by private, state and federal agencies on the territory outside the National Forests which are wholly under government protection. The state forester is urging that logging operations cease on extremely warm or windy days and that as the berry season approaches pickers in the woods refrain from smoking or building fires.

Oregon had only 100 fires reported in June with small damage, but the forces are being recruited to full strength and particular effort is being made to perfect a prompt detection and dispatching system for getting fire reports by telephone and sending men to the danger points. In few previous years has the hazard been so great at the beginning of July.

PROHIBITION PROGRESSING.

Reviewing the past fiscal year of Commissioner Haynes' administration as Federal Prohibition Commissioner, Director Joseph A. Linville invites public attention to the fact that only 2,627,333 gallons of whiskey were withdrawn as compared with 9,696,122 gallons the previous year, and 16,491,303 gallons of alcohol and other distilled spirits withdrawn as compared with 24,856,388 gallons withdrawn the previous year; that 1,216 cases were reported by general prohibition agents, taxes amounting to \$17,102,234.24 were recommended, and fines and penalties amounting to \$2,159,410.39 were imposed. Three and one-half million dollars worth of bonds were placed in suit; or proceedings begun. Reductions in rentals and disposition of seized property in the amount of \$208,832.50 were effected, and an additional saving of \$156,900 otherwise effected. Under the narcotic laws 2,195 violations were exposed, resulting in 1,109 convictions and 64,083 in fines and penalties.

Numerous changes in reorganization took place. Enforcement work has been vested in state directors and a mobile force of general agents under 18 divisional chiefs directed from Washington created; a special group was designated to prepare all criminal informations, indictments, injunctions, libels and search warrants, and concentration of claim work resulted in specialized clerks and expedition of work. One set of reports and accounts are now required for distillery and bonded warehouses instead of three as heretofore.

With a view to reducing the number of permits, all applicants to operate as wholesale druggists are doubly checked, and reports of state inspectors are verified by reinspection by division pharmacists. Manufacturers and wholesale dealers are required to give a monthly accountability of all drugs received, manufactured and sold. Forgery-proof, non-transferable permit forms effectually prevent fraudulent withdrawals.

To expedite prosecutions, all cases are reported monthly to the central office, then to the Department of Justice for supervision and preparation for speedy trial.

The service utilizes submarine chasers, speedy motor boats and airplanes.

FARMERS MUTUAL HAS PROSPEROUS YEAR

\$13,000,000 in Force, Jan. 1, 1922. The Farmers Mutual Fire Relief association made big gains in 1921 having written \$4,466,000 in risks, gained 1700 new members and paid \$28,000 in fire losses. January let the association adopted a uniform rate of 30c per hundred dollars insurance on all farm property. This low rate will enable every farmer to carry insurance. H. W. Snashall was re-elected president. Any one desiring to see him about insurance may call at the Gresham fair grounds, Phone 2101.

Half a Square Mile of Homes Burn Down

Arverne-by-the-Sea, one of Long Island's most thickly populated summer resorts, is practically destroyed as a result of a fire that started in the big Hotel Nautilus. Thousands of people are homeless, great amusement parks are swept out of existence, the Long Island Railroad station is no more, firemen from New York, Brooklyn and all adjoining villages failing to check the flames until a wholesale dynamiting of homes was resorted to. Picture shows an entire street of cottages on fire at one time.
