Mrs. McKinney, who was formerly Annie Nelson, is a daughter of Mrs. Hannah Nelson and sister of Ned, Be, John and Milton Nelson. When arriving here she had just finished a six weeks' tour of the United States, visiting Kentucky, Brooklyn, Chicago and Canada. While her trip was a most enjoyable one, she was glad to return to her beloved home city, San Francisco, where she and her husband are established in business.

A great deal of winter oats and wheat and some cheat even was killed out by freezing and thawing. Following this thinning of the planted crops the seed of the so-called buck cheat, which is often present in seed grain and also in the soil on wet lands, came up resulting in heavy stands of cheat. This has misled some persons to believe that grains planted changed to buck cheat. Such change is impossible and the unusually heavy amount of buck cheat in relation to the amount of grain is due to the fact that the cheat did not kill out as generally as the grains.

EARTH TREMOR IS FELT IN GRESHAM

A slight earth tremor was felt in Gresham about 10:10 Wednesday morning. The shock was not felt in the Outlook office but Mrs. M. D. Kern living on South Roberts called up shortly after it occurred and said she and some of her neighbors had felt the tremor. A report from Portland and other neighboring localities verified the report.

The tremor was a slight one and it only lasted about five seconds. It was hard enough, however, to make the dishes rattle in the residence district.

SPECIAL DEVICES WILL MAKE CHURCH COOL

Comfort for the worshipping congregation has always been a matter of consideration with the official board and members of the Methodist Episcopal church. The summer heat is oppressive, and may keep you from your accustomed place. But the assurance is given that the church will be cooled by electric fans, supplemented with a cooling device that will be effective. All are invited to enjoy the uplift of an evening service. The church will be cool and refreshing.

The services both morning and evening will be both helpful and inspiring. The pastor, Rev. A. S. Hisey, will occupy the pulpit both morning and evening.

The choir will sing in the morning, and in the evening the quartet will furnish a special number. Miss Della Towle will be the soloist for morning, and Oliver Gill for the evening.

Strangers visiting in Gresham will find a most cordial welcome in all the services of the church.

Before You Tour Look at Your Battery.

Before you get too far into the job of looking up maps, picking out hotels, and deciding which points of interest to visit, it might be well to take a few minutes to look over the electrical system of your car, and assure yourself that everything is ship-shape, and ready to do its part toward making your tour a success. Loose connections may mean that the battery does not receive the proper supply of current from the generator, or that it is not able to deliver it properly when wanted. Nuts and screws that hold the connections in place should be clean and should be screwed tight, so that there is no possibility of their working loose either through jarring of the car on the road, or the swaying of the wires themselves.

Begin with the battery and follow each one of the cables through the switches, assuring yourself of every connection as you go along. If this job is done thoroughly you will have no reason to worry about loose connections. At the same time make sure that there are no short circuits caused by the wearing through of insulation or by the bits of wire that sometimes drop in where they do not belong.

So much for the wiring, but at the same time it is a good thing to have the starting, lighting, and ignition units, and the storage battery looked at by the service stations specializing in these parts. No matter where you may live it is possible to find a conveniently located Willard Service Station which will test the solution in your battery, and will at the same time notify you of any unsatisfactory condition that may exist.

BLISS FAMILY HOLDS PICNIC JULY FOURTH

A most enjoyable family reunion and picnic was held under the spreading maples on the lawn at the Paul Bliss home on the Fourth of July. All day long and until midnight the people visited, played games and sang songs and all agreed that it was a day long to be remembered.

The occasion of the reunion was a visit from Mr. and Mrs. Albert Dekin, of Lowville, New York, brother-in-law and sister of Paul, John and Sam Bliss. They were the guests of honor. With them was Mrs. House, sister of Mr. Dekin, who was a guest at the picnic.

Those present besides the above, were Paul Bliss and wife and son, Arthur; Willard Bliss and wife and children, Alice Irene and Isabel Arlene; Cleveland Bliss and wife and Cleveland, Junior; John Bliss and wife; Sam Bliss; Mary Bliss Robertson and son, Dwight Alderman; Anna Bliss Kerr and husband, Harley Kerr; Frances Bliss Stone and husband, Cedric Stone and children, Evelyn and Margaret Mae; Gladys Bliss Turner and husband, Blaine Turner and children, Kathleen, LeRoy and Marjorie; Helen Bliss Camp and husband, Albert Camp.

CAMERON-HOGG MILL BURNED TO GROUND

The mill owned by the Cameron-Hogg Lumber company near Bull Run caught on fire Wednesday evening and burned to the ground. It is not known how the fire started but it is thought the slashing fire near by but under the supervision of fire warden, ignited the mill. The fire cut off the telephone service so that it has been impossible to secure definite information. From what can be learned, the loss by the fire is estimated at from \$30,000 to \$40,000 which was partly covered by insurance.

It is understood that the owners will rebuild as the insurance has been adjusted. The fire has been completely extinguished and 70,000-000 feet of timber owned by the company has been saved. Over 90 men living in the territory between Gresham and Bull Run are now out of work from the loss of the mill. The mill was closed down over the Fourth when the fire started. The officials of the company were at their Portland office when the fire occurred.

Corn and potato cultivation should be just deep enough to kill the weeds and not cut off the feeding roots of the plants. Where potatoes are irrigated or grown by ridge culture deeper cultivation is necessary to throw up the ridges, but for general level culture of the Willamette valley and the unirrigated districts shallow culture is to be preferred.
