GRESHAM, OREGON

"Every normal man desires a house of his own. He does not merely want a roof above him and a chair below him; he wants an objective and visible kingdom; a fire at which he can cook the food he likes, a door he can open to the friends he chooses. This is the normal appetite of man."—Gilbert Chesterton

JONES LUMBER CO. CATERS TO PUBLIC

The Jones Lumber company is doing a thriving business in Gresham. The yard and office is on the corner of Powell street and Maple avenue. It is a branch of the Jones Lumber company of Portland. The Portland mill on 1280 Macadam street in South Portland is one of the large mills in Portland.

J. G. Mast has been the manager of the plant at Gresham for the past five years. When asked what is the best way to get trade Mr. Mast said he believes the key to that problem is having what the builder needs. At the present time, during the shortage of cement, this yard is able to get cement through the Portland yard which has a contract calling for a certain number of car loads of cement to be delivered at a specified time. By having all of the material needed it is easier to get a complete order for all material needed for the building.

During the past year some improvements have been made at the Gresham plant. Three new roofs were put on the lumber sheds on November 1st of last year requiring between 8,000 and 9,000 square feet of roofing. All of the buildings were repainted this spring.

"No order is too small or too large to fill" is the slogan of the Jones Lumber company.

NEW LUSCHER HOME IS SANDY ROAD ORNAMENT

The new 10-room house of Mr. and Mrs. J. Luscher on Sandy road, is by far the finest structure put up in Fairview during the year. It is nearly completed, a part of the rooms being already occupied by the members of the family who have been living in temporary quarters since the destruction of their former home by fire a few months ago.

This new home is a two-story house containing 10 rooms besides the usual closet rooms and bath, lavatory and shower. It is of hollow tile construction and is finished with stucco. The interior finish includes hard wood floors, enamel in a part of the rooms and stain in others, to bring out the wonderful beauty of the wood entering into the construction.

There is a full basement under the house, the dimensions of which are 42 x 28. The best of modern plumbing is used throughout the house, which will be heated by a hot water system. Brandenberger of Portland was the architect.

The value of the house when complete is estimated at \$10,000.

Build with Brick

We Manufacture all grades of Brick for Building

HOLLOW BUILDING BLOCKS :: PARTITION TILE :: DRAIN TILE

THERE IS PLUMBING PROTECTION

No feature in your new home will contribute more to year-around comfort than the heating, plumbing and sanitary installations when backed by our guarantee.

It is not too much to say that the factors of heating, plumbing and sanitation largely control the success of home-building.

Therefore, with such facts known to you, we feel certain this firm will be called upon to submit bids—which when judged fairly—price, quality and service being equal—will add your name to our list of satisfied customers.

Home of FIRST STATE BANK In 1905

In 1909 additional space was required. A second story was supplied and the building extended to the north.

There was soon again urgent demand for more room and in 1912 the building was extended westward 57 feet and northward to First street, making a total length of 112 feet.

The bank now finds its rooms too small and is thinking seriously of enlarging.

The bank has increased its capital stock three times and now has paid capital and surplus and undivided profits amounting to more than \$50,000.00.
