A Better Oil
Even if it does cost less

It isn't what you pay but what you get in lubrication that counts. Thousands of laboratory and road tests have proved that Zerolene oils and greases reduce friction and wear to a greater extent than any other motor lubricants we have seen and tested or been able to produce. Zerolene oils form on an average 30% less carbon than any other motor oils. They form less carbon than any other motor oils known to us. And because Zerolene gives better lubrication continuously, the Zerolene lubricated automobile averages 5% more mileage from the gasoline consumed. Insist on Zerolene even if it does cost less.
