Extensive improvements are being made on the A. W. Metzger store which will add much to the appearance and increase the convenience. The office is being moved from the interior of the store to the front and will be accessible from the feed room and the grocery and hardware department. The old office will be remodeled and used as a paint room. The most striking improvement will be a large plate glass window on the east of the building, which not only will increase the light in the store but will eliminate considerable danger to traffic at that corner by giving an open vision through the store windows.
