Savior (heavily leading up to possible proposal climax)—"Oh, Helen, I have had something hesitating on my lips for some time I—"

Helen—"Yes, I have noticed it—but shove it off, George. It'll never grow."

**Good for a Headache.**

Angus Carney, who has announced that he is his own grandfather, has his neighbors doing mental arithmetic which makes the age of Angus a more primary problem.

Carney has compiled the following: "I met a widow with a grown daughter and I married the widow. Then my father met my step-daughter and married her. That made my wife the mother-in-law of her father-in-law, and made my step-daughter my step-mother. My father became my step-son."

"Then my step-mother, the daughter of my wife, had a son. That boy was, of course, my brother, because he was my father's son. But he was also the son of my wife's daughter and therefore my grandson. That made me grandfather of my wife's grandson."

"Then my wife had a son. My mother-in-law, the step-sister, is also his grand-mother, because he is her step-son's child. My father is the brother-in-law of my child, because the step-sister is his wife. I am a brother of my own son, who is also the child of my step-grandmother, I am my mother's brother-in-law. My wife is her child's aunt. My son is my father's nephew and I am my own grandfather."—San Antonio Light.

**Path to Public Good Will**

Progressive American railroads have come to realize that the best way to cultivate the good will of the public and to take insurance against misunderstanding of the railroad problems is to talk directly to the public through the advertising columns of the press and especially through the weekly newspapers, which directly reach travelers and shippers along the railroad line.

They have come to sense the fact that statements made in authoritatively signed advertising must be truthful, because the public can so easily check up anything that may be misleading. Following the progressive lead of the Long Island Railroad, this policy has now been adopted by the largest railroad system in the south, the Southern Railway System.

"The Southern serves the south" is the well-known slogan of this great railroad, with 8300 miles of lines extending into every southern state. The Southern recognizes that its own prosperity is inseparably bound up with that of the south, and its published announcements in the advertising columns of the newspapers, it is expected, will bring the Southern and the communities it serves closely together.

Unquestionably other systems should follow this general plan of talking frankly to the public, though there are evidences that some railroads still cling to the hope of putting special messages across by means of free publicity. As a fact there is nothing so beneficial, nothing so honest, as frankly signed, paid advertising, when the good will of the people is sought.

The Long Island and the Southern are to be congratulated for their forward vision.

**Use Douglas Fir Sawdust for Cattle Feed.**

According to W. H. Gibbons, in charge of the Portland office of Forest Products, the U. S. Forest Service is to continue at the Forest Products Laboratory, Madison, Wisconsin, its largest forest products research branch, the experiments in the production of cattle feed from sawdust.

Previous work of this character has been done on sawdust from eastern species. Now, Mr. Gibbons said, sawdust produced in coast mills is to be given a thorough trial by the Forest Service. Arrangements have just been made whereby the Duluth-Oregon Lumber company of Portland will supply the Laboratory with 50 sacks of Douglas fir sawdust. This shipment, after being converted into cattle feed by the Laboratory, will be used in feeding trials at one of the large eastern experiment stations.

Experiments so far conducted by the Forest Products Laboratory indicate that the sawdust of coniferous wood can be converted into a wholesome cattle feed. A preliminary feeding trial, using a product prepared from eastern white pine, was conducted in cooperation with the Wisconsin College of Agriculture with favorable results. With the sawdust feed representing about 35 per cent of the ration, the cows maintained their production of milk and showed an appreciable increase in butter fat production. A decided increase in weight was noted during the period in which they were fed the treated sawdust.

**Clerk-Carrier Examination to Be Held as Announced.**

The clerk-carrier examination which was announced some time ago to be held at Gresham on October 20, 1923, is an entirely different examination than the rural carrier examination announced for October 27, according to a statement made by the postmaster, Miss E. E. Johnson, and will be held as announced. Applications for both examinations may be secured at the local postoffice. Miss Johnson suggests that it would be advisable for the candidates for the position of clerk in the office who took the examination on July 21st, 1923, to make application for and take the clerk-carrier examination on October 20th, as well as any others who may be interested.
