The Value of Livestock to a Community. No. 3.

\$540,731,000 Worth of Livestock

THE remarkable growth of livestock raising in Pacific Northwest (including California) is best exemplified by the astounding figures representing the capital investment of over a HALF-BILLION DOLLARS in dairy and beef cattle, hogs, sheep and horses. Nor does this include the turnover in production each year.

Seldom, if ever, do varied livestock communities feel the pinch of price or production adversity, as do one-crop or one-stock producing sections. Balanced production, like balanced rations, equalize the good elements and counteract the bad.

Naturally, there is no place more interested in well developed and well sustained agricultural prosperity than the First State Bank, and wherever we can give encouragement to and assistance in bettering or balancing production, we are ready and willing.

The center round which livestock development is taking place in the West will be held November 2 to 10. This has become the largest show of its kind in America, gathering together the principal breeders and more than 3500 head of purebred dairy and beef cattle, sheep, hogs, goats and horses; of New York City. Why not give yourself the pleasure and opportunity of attending?
