

Requests for information and advice on starting or building up cooperative organizations come to the state market master from many sections of the state, which indicate that the farmers realize that they must organize and control their products and marketing if they are to continue production. Twenty-nine per cent of all the employed workers of the United States are engaged in agriculture, and it is of the greatest importance to the welfare of the whole nation that farm production shall prosper in order that nearly every other industry of the country may thrive. No city in an agricultural state can permanently flourish unless the surrounding country prospers. This fact is now being recognized by the business heads of the cities and the various commercial organizations are working on cooperative plans, and are raising large funds, to help the farmers to get a living profit from their crops.

MANY HAVE APPENDICITIS DON'T KNOW IT
Much so-called stomach trouble is really chronic appendicitis. This can often be relieved by simple glycerine, buckthorn bark, etc., as mixed in Adlerika. Most medicines act only on lower bowel but Adlerika acts on BOTH upper and lower bowel, and removes all gasses and poisons. Brings out matter you never thought was in your system. Excellent for obstinate constipation. — Gresham Drug Company.—Adv.

Two Drops of Solder

Mr. Rockefeller once discovered that if he could save two drops of solder in sealing each of his oil cans he could save \$38,000 a year. He did so and saved a small fortune annually.

To most of us the saving of these two drops of solder would have been insignificant, but to him it meant much.

This trait of saving the little things accounts in large measures for his marvelous success.

Small amounts saved regularly soon grow into large amounts—which in turn enable a man to buy a business of his own.

One cigar LESS, a day (10 cents) and in five years you have saved \$203.82.
