

GRESHAM OUTLOOK

Published every Tuesday and Friday at Gresham, Oregon, by the Outlook Publishing Co., H. L. St. Clair, Editor and Manager.

One year, \$1.50, six months, 85c, three months, 50c, single copy, 10c. Combination rates with all the Portland Dailies.

ADVERTISING Rates reasonable. Our representative will call. Official paper of the Town of Gresham. Official paper of the Town of Fairview.

Entered as second-class matter March 3, 1911, at the Postoffice at Gresham, Oregon, under the Act of March 3, 1879.

BETTER THAN PUBLIC OWNERSHIP.

Do we appreciate the service rendered by and the important place in public economy of our public service companies?

Gresham and eastern Multnomah is fortunate in being served by these companies practically as well as any persons or enterprises in Portland.

Our public corporations realize as never before that there is a vital relation between the service they render and public good will and support.

They also realize that the user's good will follows his investment. Hence they encourage the buying of stock locally.

Take for instance the Portland Gas and Coke company. It is a fact that more than 90 per cent of this company's stockholders are located in Portland and vicinity.

These stockholders hold more than 77 per cent of the stock. This does not include subscribers, or those who will ultimately become stockholders under the time payment plan.

If these were included the percentages in each case would be even greater. Remarkable progress in the sale of its stock is evidenced by a comparison of the above percentages with those of 1917.

In 1917 43 per cent of its stockholders were located in or near Portland and they owned only 33 per cent of the stock.

The company has 465 employees who are either stockholders or subscribers to its stock to the extent of 1,281 shares, or \$128,100 worth.

The company, therefore, is not only a local enterprise because it serves local people and its property is situated in Portland but it is also a local enterprise because its ownership is principally vested in local holders of its stock.

There are only six states in the union which have taken no official action in matter of regulating busses.

FOR PROSPERITY—A SANE COMPROMISE.

Perhaps the most satisfying news of the week has been the report that democratic and republican leaders have concluded to get together on the matter of taxation and prepare a measure that is not political.

Even the blind should be able to see we will never get anywhere in this country in sound taxation so long as our tax system is mixed with partisanship.

The nation has suffered from this absurd situation all too long. The same has been true of the tariff. It took years to get this thought of a non-partisan tariff imbedded in the minds of the people.

Fortunately, however, the way being blazed, it comes easier now to realize when we consider taxation that economics and politics don't mix well.

This newspaper has taken occasion before to point to the evil effect on business of the existing system of taxation. Fortunately the light is at last beginning to filter into the public mind.

The present tax proposals should arrest the attention of every thoughtful citizen. An impartial analysis will disclose the reasons for a deadlock have been largely of a partisan character.

Naturally everyone wants a reduction in national imposts, but it must be remembered that apart from the relieving the people of ordinary means there is another and perhaps more important phase of the question.

A plan that cuts down the tax of the small man, but which does not loosen the monies of the millionaires and put those monies into the channels of business will be a flat failure.

One of the most important aims of a new tax bill must be to release the hoarded millions of non-taxable securities and put the money into the development of industry.

The Mellon plan, in cutting the surtax, provides a figure perhaps ten or fifteen per cent greater than the millionaires would like. At the same time it is believed it will serve to open the door of relief.

On the other hand, the democratic proposals have a more popular appeal in that they would give the small man greater relief, but continue to "soak the rich." Certainly they would never release money for business expansion.

Perhaps between the two plans some sane compromise may be reached. It is hoped so. Quite apart from its moral injustice the country has come to learn and at heavy cost—that "soaking the rich" is not a very profitable pastime, after all.

Tips for Taxpayers.

No. 8. Deductions for bad debts and contributions, which are allowable under the revenue act, form a considerable item in the income-tax returns of many taxpayers.

Bad debts can be deducted only for the year in which they are ascertained to be worthless and charged off the books of the taxpayer. The return must show evidence of the manner in which the worthlessness of the debt was discovered and that ordinary and legal means for collection have been or would be unavailing.

Unpaid loans made to needy relatives or friends with little or no expectation that they would be repaid are not deductible but are regarded as gifts.

"The automobile always beats the train to the crossing,—barrin' an accident."

Bok Prize Winner

Charles H. Levermore, of Brooklyn, N. Y., Secretary of the N. Y. Peace Society and former President of Adelphi College is the winner of the Bok Peace prize. He was presented with the \$50,000 check at announcement and will receive the other \$50,000 if his plan is accepted through the national referendum vote now in progress.

Timely Comments

By Arthur Brisbane.

Now comes Mr. Doheny, one of the ablest business men of the country, who testified that he lent his old friend Mr. Fall \$100,000 which he gave him in cash in a suit case, and Sinclair lent, or gave, Mr. Fall \$140,000, some in bonds. "Easy money?" Yes, very.

Mr. Fall says, "I am a sick man." That isn't because he couldn't hire a doctor, apparently. One hundred thousand dollars in cash in a satchel that Mr. Doheny loaned to Mr. Fall without taking his note or receipt had nothing whatever to do with the fact that a few weeks later Mr. Fall, as secretary of the interior, member of President Harding's cabinet, leased 28,000 acres of oil lands in California to Mr. Doheny.

Mr. Doheny says he believes the company will make one hundred million dollars of profit out of that lease, which shows that he is a good business man. The next time the United States needs a secretary of the interior it might hire Mr. Doheny. He knows how to make a good bargain; more than can be said for some of our secretaries of the interior.

North Carolina forbids teaching in public schools "any form of evolution which makes it appear that man descended from any of the lower order of animals, monkeys or anything else." The North Carolina authorities should also forbid study of embryology. It is discouraging to find, in embryonic conditions, that human beings in the period before birth, pass through various animal stages, duplicating practically all of them, from the single cell up to the fully developed "primate."

At one stage of his development before birth every man has two feet like a gorilla. Sometimes one of the feet does not develop, and the man is born with one gorilla foot, which we call a "club foot."

That can easily be arranged by forbidding the teachers to say anything about embryology. If you don't like facts, why, smother them.

Doctor Semashko announces that Lenin's brain weighed 1,340 grams; not an unusual weight. The brain of Turgeneff weighed 2,000 grams. That of the great naturalist Cuvier was even heavier. But the convolutions in Lenin's brain were extraordinarily deep. That is what counts.

The deeper the convolutions the larger the surface of the brain, and all thinking is done close to the brain's surface, just as all crops are raised close to the earth's surface.

In the depths of the brain, doubtless, as in the depths of the earth, are hidden great treasures not yet developed.

Surprising to Americans that do not know the English is the fact that Englishmen of high rank and most conservative traditions consent to join the labor government.

You could not imagine any of our powerful reactionaries joining a cabinet with a union labor man at its head. Britain has statesmen, used to changes, asking only, "How can I render service to the Empire?"

It is announced that President Coolidge will veto any tax bill carrying a higher surtax than 25 per cent. In time of war any tax is just. When government says to the poor man, "I will take your life for a dollar a day," and takes it, it may well say to the rich man, "I will take half or three-quarters of your income."

But the war is over. Excessive taxation discourages new enterprises that employ new labor and develop new wealth.

If this country knew as much about collecting taxes as they know in England, a 25 per cent surtax on the biggest incomes would produce an amount of money that even our excellent spenders couldn't spend.

Wireless signals in the code of the United States navy have been heard 1,400 feet down in a mine in Arizona.

"Sound without wires going through 1,400 feet of solid earth" seems marvelous. But we must remember that there is no such thing as "solid" earth. And there is no such thing as solid matter, only electrons, that form atoms, atoms that form molecules, and molecules that form what we call matter, the particles of that matter being as far from each other, in proportion to their size, as the earth is from the sun. There is no reason why radio waves shouldn't go anywhere, since there is no solid matter to stop them.

It doesn't pay to make children work too hard. What they need in youth is warmth, affection, exercise, good food, long sleep. Heavy learning can come later.

You have read about William James Sids, the boy phenomenon who, at 11 years of age, was in Harvard University, debating with professors on the fourth dimension, and came out of Harvard at 13.

That young gentleman is working now as a clerk at \$23 a week and doing his "higher mathematics" on a cash register. He says he hates the name of Harvard. He is discouraged, and, from a published interview, appears to lack the greatest of assets, mental courage. It's easy to take that out of a human by over-forcing in childhood.

The vanity of parents ends sometimes in destruction of the child's chances.

Various concerns offer to rent Muscle Shoals, suggesting in a feeble, doubtful kind of way, that they will "make fertilizer." The farmers of the United States have Henry Ford's positive promise that he will produce cheap fertilizer at Muscle Shoals. The farmers and others want Henry Ford to make good on that proposal and he should have the opportunity.

Ford shows you in the state of New York, one of his new plants, an industrial building, 1200 feet long, with not a smokstack on it, everything done by the power of water changed into electricity.

Give Ford the chance at Muscle Shoals and he will do everything possible to keep his pledge to give the farmers cheap fertilizer. He will do what is infinitely more important, showing the people of the United States how the water power of this country should be used for the people's benefit.

People talk of "a saturation" in the motor industry. There is no such thing as "saturation" in the automobile world. People buy cars, use them up, buy others.

The farmers in the country used to buy two million buggies every year. We only manufacture four million automobiles a year now. At this moment the country ought easily to absorb six or seven million cars a year. Every car pays for itself in time-saving and represents economy.

For Cloven Hoofs. A sign in the window of a Dubuque (Iowa) shoe shop reads: "Ladies let us cover your satin heels."
