

GRESHAM OUTLOOK

Published every Tuesday and Friday at Gresham, Oregon, by the Outlook Publishing Co., H. L. St. Clair, Editor and Manager.

One year, \$1.50, six months, 85c, three months, 50c. Single copies, 10c. Combination rates with all the Portland Dailies.

ADVERTISING Rates reasonable. Our representative will call. Official paper of the Town of Gresham. Official paper of the Town of Fairview.

Entered as second-class matter March 3, 1911, at the Postoffice at Gresham, Oregon, under the Act of March 3, 1879.

It's faith in someone and enthusiasm in something that makes life worth living.

The daily papers continue to feature the oil scandal investigation, Attorney General Daugherty being at present the center of fire. Not all of his seeming irregularities are in connection with the oil leases. He is mentioned in connection with other scandals, as "deal" for parol of convicts, flight film case and oil stock trading.

After days and weeks of uncertainty, during which the continuator of the Rose Festival hung in the balance, it was decided yesterday to repeat the festival this year. The probable date will be June 11-13.

Curtis D. Wilbur, of California, has been appointed secretary of the navy in place of Edwin Denby, resigned. He has declared his willingness to accept if his appointment is confirmed by the senate. He is a lawyer and justice of the supreme court and, according to the news report, is 68 years old. He is a graduate of the Annapolis naval academy.

"Seventeen Volcanoes in Action," says a news report from Tokio. One would think from the political eruptions in this country that there is considerable turbulence on the old earth's surface.

The old saying, never put off until tomorrow what can be done today, is usually applied to the doing of some heavy task but it should include also the cheering smile, the kindly word, the friendly letter and the beneficent deed.

MAKE HIGHWAYS SAFE.

The maximum use of roads can only come when they are made safe for maximum use. A dangerous road will always be less used than a safe one, and a road dangerously used by some will be less used by others than a road wisely used by all.

At the present time two states give licenses to drivers without any examination of any kind. Ask for it, pay a fee, and get it. Drive anyway—safely, dangerously, drunkenly; these states apparently do not care! Ten states have an age limit on drivers; you can give a child of five a car and tell him to drive to town, without violating the law.

Naturally, these states do not have roads as safe as other states which insist on ability to drive before granting a license and recognize the fact that a ton and a half of steel at speed is no missile to put in the hands or the judgment of a small child.

One of the great benefits which will result from the establishment of national highways throughout the nation will be uniform laws for their use. Such laws will not in anyway conflict with state laws, for the states through which the highways pass will have equal voice in the making of national highway laws. It is evident that when a road is national property the nation is responsible for who shall and who shall not drive upon it and the speeds at which driving shall be done.

More and more it is coming to be believed that great trunk-line highways must be more than single roads; that they must have a central span for fast going and other spans for slower going. The way to make speed safe is not to hold it down but to make a place for it. But the immediate question is not so much safety from speeding as safety from incompetence of driving as well as incompetence of road building, which permits the dangerous curve, the unfenced bend near a bluff, the too narrow road, the absence of illumination, etc.

These, and the problems of no laws or poor laws, may be solved in time, under any system, but will be solved speedily and solved well by the establishment of a system of national highways, great trunk lines, built and forever maintained by the national government, which will also supervise their use and police their length.

Studying Electricity for Use on Farms. An immediate survey of electric power farm application in every country of the world where electricity is in use, will be undertaken by the government under direction of Secretary of Commerce Hoover, for the benefit of American farmers. While the United States leads the world in this as in other electric power applications, many beneficial results are expected to come of the survey.

BE A FRIEND. Oh, you'll not be any poorer if you smile along your way; And your lot will not be harder for the kindly things you say. Don't imagine you are wasting time for others that you spend; You can rise to wealth and glory and still pause to be a friend. —Edgar Guest.

Timely Comments

By Arthur Brisbane.

How many sturdy Americans willing to serve their country are now planning to be president, do you suppose? There was a general feeling that McAdoo had the democratic nomination unless Al Smith could get it away from him. It seemed certain that Mr. Coolidge had the republican nomination by an overwhelming majority on the first ballot.

But a little oil makes a great difference in the political situation, and now anybody has a right to hope. Many an ambitious American is spending his dollars now, handing them to "political experts" in return for presidential promises.

There are probably at the least one thousand "serious" candidates at this moment.

Friendly warning to big men inclined to injure business and scare little stockholders in revenge for the senate oil investigation. Don't do it.

It won't pay you in the long run, and, besides, it is written, "Dearly beloved, avenge not yourselves... vengeance is Mine, I will repay, saith the Lord."

Public officials have had a warning, learned a lesson. Some will get more than a lesson. Valuable truths have come out; others are coming.

On the whole it's a small thing, which really doesn't amount to much more than catching little Willie telling a fib. No reason for breaking up the family. Send Willie to bed and let business go on.

Another copper concern, the Inspiration Copper Company, followed the example of the big Anaconda, and skipped its dividend. That means bad salesmanship and not enough advertising. If the copper men would explain, through advertising in plain language, what copper means and what it saves in building, no company able to produce copper at 20 cents a pound, or better, need lack business.

The house at last will take up Henry Ford's Muscle Shoals offer. It seems hard to get anything moving when no gentleman "on the inside" is to get any money in a satchel or any "loan" from a friend.

Ford offers millions to the government, cheap fertilizer to the farmer and, most important, demonstration of the use that can be made of water power. But that isn't enough to interest gentlemen accustomed to "private talks," "private codes" and "private financial arrangements."

Attorney General Daugherty declares that "if some senators do not resign he, Daugherty, will cause some splash."

Mr. Daugherty knows the difference between a "splash" and a little ripple. The public will watch for the splash with interest. The attorney general could reveal more about the real character of certain officials than half a dozen oil investigations. He knows what senators and others are trying to shield, and whom they seek to prosecute.

Publication of Mr. Daugherty's private information would cause a "splash" indeed.

An Appropriate Poem.

While the rain is brewing, And the worm is on the still, There's a man a-digging for you In the graveyard on the hill. While you are busy mixing Up a synthetic gin, Another man is fixing A box to put you in. —La Crosse, Kan., Republican.

Vice President Aims

George L. Berry, President of the International Printing Pressmen's Union, has filed in Ohio as candidate for Vice-President on the Democratic ticket.

Farm Pointers.

Selection of vegetable varieties before planting time may prevent much grief at harvest time. Select not only according to season, locality and soil, but also consider market requirements of size, shape, color and quality. It is easy now to determine varieties. Grow what is wanted. A suggested list of varieties can be obtained from the section of vegetable gardening at O. A. C.

Study This Out.

It is reported that an Englishman was offered a drink from a genial American's flask as the big liner sailed into New York inner harbor. "And what is that?" asked the Britisher, as he paused with flask in hand and pointed to the Statue of Liberty. "Why, that's our famous Statue of Liberty," replied the American. "Oh—I see," said the Englishman. "We occasionally also erect monuments to dead people in our country."

T. M. HURLBURT REPUBLICAN REPRESENTATIVE INCUMBENT

Is the Right Man for SHERIFF See that he is nominated and he will be elected. His name inspires confidence for it stands for efficiency, honesty and law enforcement. —Adv.
