The twenty-five Pierce-Arrow touring cars used on "The Horseshoe Route" out of Merced to Yosemite are lubricated exclusively with Zerolene.

Seeing YOSEMITE on ZEROLENE-lubricated bearings

If you haven't traveled the Horseshoe Route out of Merced to Yosemite in one of the Pierce-Arrow touring cars operated by the Yosemite Stage and Turnpike Company, you've missed something.

But whether or not you have made this trip, you'll be interested, as a motorist, in knowing that the twenty-five Pierce-Arrow cars used in this service are lubricated with Zerolene. The manager of this famous stage line writes:

"We have been operating a stage line since 1911 and have always used Zerolene. Recently we disposed of some cars that had been in our service for ten years, and during that period none of them had ever had a bearing scraped."

Whether you drive a Pierce-Arrow or a Ford, the use of Zerolene, of the proper body, will not only cut down your oil bill, but give you greater gasoline mileage, less carbon, lower upkeep costs, and a longer life for your car.

Big users refuse to pay tribute to the old superstition that there is something mysteriously "better" about "eastern" oils — why should you pay that tribute?

Insist on Zerolene, even if it does cost less.

"Lucky Dog!"

"See that fellow over there." Two young men were talking. "He is sure a 'lucky dog.' Grabbed an option on a piece of property the other day with \$1500 and sold his option yesterday for \$12,000. I'll say that's luck."

"Sure is," said the other.

But both failed to realize that the "lucky dog" HAD the \$1500—saved out of his earnings. Chances like this come up frequently.

Have you a few hundred saved up in the bank that will make you "lucky" too? Just a dollar starts the "lucky piece."
