INSURANCE FOR FARMERS.

The Farmers Mutual Fire Relief Assn., of Portland, is upon its 21st year, and is the largest Farmers Mutual Fire Insurance Assn. west of the Rocky mountains. The yearly report filed with the Insurance Commissioner shows a total membership of more than 13,000, with \$20,500,000 in force, an increase of \$2,500,000 over that of 1923. The fire losses for 1924 aggregated \$55,000, all of which have been adjusted and promptly paid. No lower rate on farm insurance can be obtained from any other company in Oregon. If you believe in co-operative movement among the farmers and need insurance, call on President H. W. Snashall, at the Fair Grounds, Gresham. Phone 2101.—Adv.

Correct form in driving means minimum drain on the pocketbook. Velocity stops and starts prevent unusual strains on the engine, clutch, transmission, tires and tires. They also cut down the consumption of gasoline and oil. A well made engine, like a Swiss watch, is a sensitive thing. It resents abuse, but responds willingly and capably to gentle handling—Erwin Greer, President Greer College of Automotive Engineering, Chicago.

The reason for the high favor with which the closed type of automobile is regarded seems obvious. The well built closed car affords, in summer and winter, a greater measure of comfort than is possible in the open type of vehicle. With windows lowered, the touring sedan or coupe becomes an open car, providing protection from dust, rain storms and other summer disturbances. In the winter months, with windows closed and equipped with a heater, the sedan or coupe always is comfortable. And comfort, after all, is the factor that most appeals to the present-day motor-car owner.

What will the final equipment of automobiles be? This is the question that is brought up almost every time several motor-car owners get together for a few minutes' chat on what their car can do.
