The Shultz families had been intimately acquainted with the doctor at Jefferson and Mrs. Duncan had known him at Bay City where for six years before coming to Gresham she had been employed as a clerk in his drug-store and as general assistant. Dr. H. H. Ott, Jackson Jones, George Duncan and Mrs. M. Welch have each contributed several bottles of milk to his sly operations. One evening just at dusk he was chased some distance by Elwood Duncan, but no one else seems to have seen him. The Rev. E. G. Judd returned Saturday from the national convention of the Northern Baptist association which convened in Seattle during all of last week. Maytag
GYRAFOAM Aluminum
Washer

has a washing capacity of 50 pounds of family clothes per hour.

This machine has more points of real merit than any other washing machine on the market.

It is beautiful in appearance, simple, safe and economical in its operation.

These points make The MAYTAG GYRAFOAM WASHER stand above all others.

- 1 It is made entirely of metal, a cast aluminum tub, which cannot warp, rust, rot, swell, split or corrode.
- 2 It is not a dolly, cylinder, vacuum or oscillator; the action of the water is produced by a startling new principle, which actually washes faster and cleaner than by any other principle.
- 3 It has a metal frame wringer of low design which makes it easy to reach over; wrings backward or forward; adjustable, swinging to five positions, and can be lifted from the machine if so desired; automatic drain plate; positive tension release, which entirely separates the 12 inch wringer rolls.
- 4 The lid is free from mechanical contraptions of any kind, which allows the operator to open the machine while it is in operation and inspect the clothes as they are being washed.
- 5 The Model 80 machine has a one-quarter horse power, General Electric motor, while the model 82 is equipped with the MAYTAG MULTI-MOTOR half horse engine.
- 6 The machine can be adjusted to any height; and has extra heavy castors permitting it to be easily moved.
- 7 It has a worm drive gear, the same as 85% of the large, heavy duty trucks, which insures plenty of power and smooth operation; all gears run in a bath of oil; less gearing on the Gyrafoam machine than any other washer on the market.
- 8 Will wash faster, cleaner, and more efficiently than any other machine, due to the sycrator which is in the bottom of the tub.
- 9 Behind it is the largest washing machine factory in the world, and a company of 30 years of successful manufacturing experience.

In building the Sandy grade for the Mt. Hood Loop highway east of Gresham some trouble was encountered on Tuesday when the contractor, under direction of the county commissioners, started tearing down the barn of J. J. Robertson, one mile east of town. A temporary injunction was issued which caused the work to stop for the time being. It is claimed by Mr. Robertson that when the grade was set for this road it cleared the barn, but that afterwards the stakes were re-set to cross directly through the center of the building. The action of the county in this regard is working considerable hardship on the aged owner of the premises.
