Every Tax Reduction Helps.

About 9,000,000 persons make income tax returns. But 100,000,000 more Americans help make the money the 9,000,000 pay. None escape the tax. The government spends \$10,000,000 a day. The people have to earn that money and pay it to the government. If federal economy causes a saving of \$1,000,000 a day, the money saved will not be piled up to make a large extent, national government economies are offset by local government extravagances or bad management. But the fact that there is saving anywhere is cause for rejoicing. A cut in the income tax at least will save money to help pay local taxes—until they also may be reduced.—The Manufacturer.

A Change in Sentiment.

Everyone recalls the time when public sentiment seemed to be strongly set against the railroads of our country, says The Manufacturer. The perseverance and good judgment of those into whose hands the railroads were turned after their disastrous federal control during the war has worked the miracle of reversing public sentiment and securing friends where enemies previously existed.

25 Years of

Firestone Service

to Highway Transportation

25 years of anticipating the requirements of motorists—making manufacturing processes more certain—producing a higher standard of quality—25 years of unswerving adherence to the Firestone pledge, "Most Miles per Dollar"—summarizes Firestone's record of service to car owners.

Firestone factories have grown from a small building approximately 75 x 150 feet to mammoth plants having floor area of over 60 acres—from a capital of \$50,000 to over \$50,000,000—from an annual sales volume of \$100,000 to over \$100,000,000—all in the short period of 25 years.

This Firestone record could only have been made through furnishing the public with outstanding values and is, consequently, your assurance of quality and lowest prices.

If you would like to know more of this wonderful record, ask your Firestone dealer to send you an illustrated folder.

With today's high cost of crude rubber and other raw materials, Firestone's opportunity to serve the public was never better, due to its great volume and special advantages in buying, manufacturing and distribution.
