Stabilizing the Farm Income

ALTHOUGH but one of several important ways of stabilizing the farm income, diversification of crops, combined with the addition of a well balanced dairy herd, is of no doubt the most important. The workability and saneness of this method is the same as that exemplified by the business man who scatters his investments so that a single failure cannot exhaust his resources.

In our cooperation with the farmers of this section, the First State Bank has seen the benefits of diversified farming indelibly impressed upon the progress of this community. We believe that more general practice along this line will do much to permanently better local agricultural conditions and are therefore unsparing in our encouragement in this regard.

Are you going to the Pacific International Livestock Exposition at Portland, October 21st to November 7th? It is an unequalled opportunity to benefit in livestock raising by the experience of others. The very best in the country will be featured in Beef and Dairy Cattle, Horses, Hogs, Sheep, Goats and Poultry; also Land Products Show and the thrilling Horse Show.
