The Cow as a Factory

More of the dairy cows of the country were examined from the critical basis of efficiency, as a factory is examined by the owner, there would be many of the cows for sale or trade. Inefficient cows for milk production are cutting down the incomes of thousands of dairymen.

The First State Bank knows that there is a constant need for improvement in dairy herds of this community as well as in other sections. We are keenly interested in this profitable production and are glad to assist in building up and bettering the herds of farmers who are in our banking territory.

We urge every progressive dairyman to attend the Pacific International Live-stock Exposition at Portland, October 31st to November 7th. Here not only the best beef and dairy cattle will be exhibited but also the largest gathering of Hogs, Sheep, Goats and Poultry ever assembled under one roof in America. It is close at hand and offers a liberal education of inestimable worth.
