Chiropractic For That Cold

QUESTION—"About this time every year I am threatened with Pneumonia after a siege of continued colds. Should I take you long to correct my trouble?"

ANSWER—Neglected colds often lead to something serious, such as Influenza or Pneumonia. A spinal Analysis which means an examination of your spine, will enable us to locate what is causing your susceptibility to colds. After we have located the real cause, it will then be a matter of taking Adjustments regularly until the cause has been corrected. Length of time required in all cases is dependent upon the severity of the abnormal condition in the spine. This is variable in different persons. Each case is a study in itself. There are no two cases alike. Thus you may understand the importance of a thorough spinal examination. When this has been made we can give you a quite accurate opinion. Your first step toward ridding yourself of this susceptibility to colds, is to Telephone 1321 for appointment.
