

WRITER PRAISES CANDIDATE FOR GOVERNOR

Gresham, Oregon, March 5, 1926.—Editor Outlook:—It may be of interest to your readers to know that a number of citizens desiring to support a clean cut man for the republican nomination for governor at the coming election have urged William A. Carter, whose card is enclosed, to make to try for the place.

The writer had the pleasure of attending the get-together meeting at the Imperial Hotel last evening for the purpose of hearing Mr. Carter state what he would try to do, support, and the effort he would make to win.

He said he accepted the request to come out with the understanding that he must be supported by a clean campaign free from personal mud slinging, money buying, or extravagance, and that while making every determination to be honestly nominated by the people, it must be because they feel he is best qualified and that they can rely upon his conscientious belief in what he says he will support and do if successful. If elected he wants all those supporting him to feel the same in every way about him while in office as during the campaign, and if

possible still more after he has served his time.

He told the writer personally some time ago that he would be glad to give a talk on good government in Gresham, through the invitation of the ministers of the town or any other body of citizens.

MORALS OF YOUNG SCORED
Percentage of crime among boys and girls declared high
Washington, February 22, (United News)—Moral conditions among boys and girls of high school age are shocking, John J. Tigert, United States commissioner of education, told several thousand school teachers assembled in the convention of the department of superintendence of the National Education association here.
"The percentage of crime now reported among boys and girls of high school age by reputable authorities has become almost incredible," he said. "I refuse to give any further currency to the statistics on this and other shocking social conditions. We have enough to know that there has been a serious breakdown in character and integrity."
—Oregon City Enterprise.

Will not character and integrity be restored when we insist on Superintendents and Directors hiring teachers who will teach thrift and exercise strict economy in all school matters which must necessarily dispense with much pomp, pastime and pleasure? Let's try it. Statistics show more crime in the United States per capita than in any other country. To any patriotic citizen the situation is alarming. The more thrifty countries have less crime. You and I are responsible for the crime and the cost of combating it—our own high taxes.

The First State Bank believes in teaching thrift in the schools, otherwise the efforts at home are lost.
