Prices of Hudson and Essex cars are now at the most favorable levels of their history as the result of three recent rapid-fire moves by the Hudson organization.

The first announcement of this series was the adoption by Hudson-Exsco distributors and dealers of an at-your-door system of quoting motor prices, replacing the f. o. b. factory plan of many years' standing. Closely following this came the action of making the federal automobile tax reduction immediately effective. On top of these moves, the announcement was made this last week of a horizontal reduction of \$50 a car on the Essex and Hudson coaches and the Hudson Super-Six brougham.

"With these three actions all to his advantage, the Hudson-Exsco buyer today is obtaining these standard, well-known automobiles at the lowest first cost and at the best terms we ever have known," said M. C. Webster, Hudson & Essex dealer. "Any one of these steps might have been a great event in itself; combined, they make up a most aggressive and forceful bid for a tremendous spring business. Today, the successful automobile maker must not only be able to produce his cars with economy, but also

The Answer is the Same

By the same token, don't think your car is hopeless just because it is losing power and hasn't the pick-up it used to have.

We can re-condition the cylinders, install new guaranteed piston rings, pistons and pins, and restore all its old-time power and pep.

There'll be no obligation on your part and we'll be glad to give you a price in advance for the necessary work.

A re-conditioned motor will mean additional service, economy and comfort. We are waiting to serve you.

he must see that the economies in his plant are duplicated in the economies of selling. When savings in any direction are possible, the public will reward the concern which passes them along. It has rewarded Hudson-Exsco by making it the biggest builder of six cylinder cars in the world. "The steps taken in these latest Hudson-Exsco activities are well in line with these principles. The cars are made economically, and are sold on terms and conditions which are clearly in the buyer's interests. The at-your-door plan, for instance, tells the buyer at his first inquiry the whole amount which his car will cost him; there is no f. o. b. base price, to which he must add \$100 or more to get the actual price. A buyer is not led to expect to buy a car at one price, and then find that this is not the actual expense he must incur.

"Hudson-Exsco at-your-door prices are the figures at which an equipped car will be delivered at any buyer's residence, with no further 'extras' to pay. It is my prediction," says Mr. Webster, "that this program will find such favor that public pressure will make it universal.
