**Re-Elect CRUMPACKER TO CONGRESS**

**"He Has MADE GOOD!"**

Mr. Crumpacker is a man of action. He has introduced 26 measures during the present term of congress, seven of which have already passed, five of which have been recommended for passage and the balance of which are pending.

Collier's Weekly says of him: "It usually takes four or five years for anyone to know that a new congressman has arrived in Washington. Congressman Crumpacker arrived in Washington the first Monday in December and he is already the boon companion of the men who run the house of representatives."

Mr. Crumpacker is a member of the Rivers and Harbors committee where he can and will protect Portland's interests in the Longview bridge controversy. He believes in port development along the Oregon coast line that will facilitate the marketing not only of private timber but of government timber as well.

Mr. Crumpacker stands for rigid enforcement of all laws.

Service men know that they have a comrade in Washington who can and who will work for their interests. Mr. Crumpacker was the most potent influence in getting the veterans hospital for Portland. He is the co-author of the Oregon soldier's bonus law.

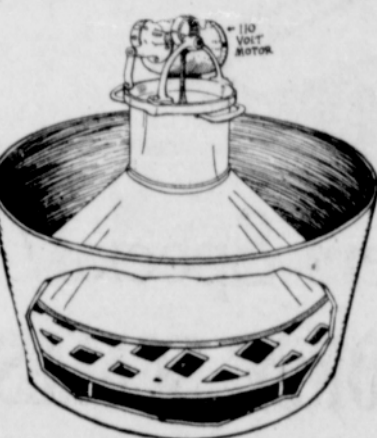

Mr. Crumpacker was born in Indiana and he spent much of his early youth in Washington where his father was congressman from Indiana. He came to Portland after graduating from Harvard law school and he practiced law here until his election to congress two years ago. He married the daughter of Oregon pioneer parents. Mr. and Mrs. Crumpacker have three sons.

Congressman Crumpacker has already requested that his absentee voters' blank be forwarded to him at Washington. He will remain on the job in the national capital on account of the many important matters which are now being considered.

Crumpacker is giving good service. Keep him in Congress.

**You have heard it—"they are all good automobiles"**

THE impression that all cars sold at approximately the same price give approximately the same results, never was less true than today.

There are now two ways of building motor cars. One is to forget quality and build cars for trading purposes. The cost of production is cut to the bone, so that dealers may offer you more than the market value for your used car.

The Buick way is to build for quality's sake—to give owners a better new car full of value—with every modern feature.

Compare Buick design to that of other cars of the same or higher list price, and fix Buick superiority firmly in your mind, before you spend your money.
