How to make Strawberry Jam
keep the color and flavor of the fresh berries

Your jam will taste enough like fresh berries to use in strawberry shortcake if you make it this new, easy, short-boil way with Certo. Save the following recipe to use for your first batch of strawberry jam.

Cut in halves lengthwise with stainless knife about 2 quarts of small or medium-sized fully ripe berries. After halving, weigh out 2 lbs. berries, or measure 4½ level cups of berries, packing solidly into the cup until juice and fruit come to the top of the cup. Add 7 level cups (3 lbs.) sugar and mix well. Use hottest fire and stir constantly before and while boiling. Bring to a full rolling boil and boil hard for 2 to 3 minutes. Remove from fire and stir in ½ cup Certo. Skim and stir repeatedly for just 5 minutes after taking from fire, to cool slightly. Pour quickly and cover hot jam at once with hot melted paraffin.

The short boiling time, possible only with Certo, prevents the loss of delicate flavor and the darkening in color which used to occur during the old long boil. It also gives you a larger amount of jam, since you save the large quantity of juice which used to boil away.

Certo is a pure fruit product—the jelling substance of fruit refined and bottled. A book of simple recipes comes with each bottle.

Your grocer carries Certo, or you can send 10c (for postage) and get a trial half-size bottle which will make from 6 to 10 glasses of jam or jelly, depending upon the recipe used. Write Douglas-Pectin Corp., 122 D Granite Bldg., Rochester, N. Y.
