

It may be propaganda of the sugar companies but catarrh sufferers are advised to sniff powdered sugar. It is said to be a cure. "Powdered sugar has properties helpful in the treatment of catarrh," says an eminent doctor. "It is bactericidal, or germ-killing, in the presence of excessive moisture." It will relieve snoring and halitosis in a few weeks' use, says this authority. The trouble with most of us in this treatment would be to get the remedy above our mouths.

This year is said to be the 75th anniversary of the manufacture of ice cream for commercial purposes. We didn't imagine the making and sale of this delectable stuff started half that long ago. Perhaps that's because we didn't get much of it when we were a boy.

Fire Ruins Interior of Car.

The family of J. F. Whetstone was roused from their slumbers about 1 o'clock Sunday morning by the crackling of flames outside a bedroom window where the auto belonging to L. P. Cysewski, a guest in the home, was standing. The interior and top of the car were completely ruined, upholstery and wood being a charred mass, although the steering wheel and engine were found to be still in commission after the flames had been extinguished.

Mr. Cysewski and members of the Whetstone family had been in the machine earlier in the evening but had returned about 11 o'clock and left the car standing in front of the house. No occupant of the car had been smoking, so it is certain unless the fire was caused by a defect in the wiring of the machine, someone had been tampering with it from the outside. It was a new 1926 Ford coupe and was well insured. The owner was able to drive it to Aberdeen Sunday where the loss was to be adjusted.

"Carrots will make you beautiful" is indirectly true, because carrots are an excellent source of mineral matter which is used in regulating processes and building tissues. They are especially rich in calcium and a good source of at least three vitamins.
