Encourages Thrift Among Young People.

During the early part of this year the First State bank announced its intentions of giving an Award of Merit Certificate to each child that made a deposit each month covering a period of 12 months, and a three by five-foot flag with jointed pole, halyards and bracket to each new depositor making a deposit of \$5.00 or more in the savings department.

It met with such success that the bank believes it a great factor in encouraging thrift among the young and has decided to continue giving such certificate and flags to its young depositors until further notice. The bank carries about \$50,000 more deposits than it did one year ago and has about 200 more active accounts.

The bank has always taken great pride in encouraging thrift among the young people and believes that through such a course covering a long period of time the community and the bank will be mutually and lastingly benefited. Through its existence of 22 years under the same management it has been interesting to note the continual steady growth of the bank along with the continued progress of the community. The bank has during those 22 years of existence acquired resources amounting to three quarters of a million dollars and the community has added many millions of dollars to its resources. It is the mutual benefits that count and are lasting.—Adv.
