America welcomes it with open arms
 On no other occasion has any new motor-car so stirred the interest and enthusiasm of the motor-wise American public as has this new "70" Willys-Knight Six . . . So superior is this car in its phenomenal power, so different in its many advantages, it is easy to understand why its grip on the public imagination has been so intense and so far reaching.
 This new "70" Six applies the principles of high-speed engine construction to the Knight Sleeve-Valve motor with startling results. With a 2 15-16-inch bore and 4 3/4-inch stroke this new Sleeve-Valve Six engine delivers greater power per cubic inch of piston displacement throughout its complete range, than any stock American motor-car engine built today.
 In speed and power the new "70" Willys-Knight Six literally out-performs all other stock cars of comparable size. It affords an unequalled combination of liberal room with modern compact appearance. It has a long, racy effect with moderate actual length. Here, is an economy of weight never before achieved in a car of its type.
