that startled the motor car industry

THE motor car industry was startled when Buick presented the new Buick with an engine vibrationless beyond belief.

If you have driven this great new car, with this remarkable engine, you know why.

Its fluid smoothness makes other motor cars seem rough, harsh, noisy.

People who have driven Buicks for years and people who have owned much more expensive cars, are captivated by the luxury of this one.

This is the Difference

Ten per cent of the farms of Oregon have electric service, all from regulated utilities.

Less than three per cent of the farms of Ontario, Canada, enjoy the benefits of such service.

In Oregon the regulated utilities are extending their lines as fast as business conditions reasonably permit. Gradually but steadily that service to rural communities is increasing.

Ontario, served in part by the provincial government, serves the centers of population.

Government operation means political operation.

Political operation is after the votes.

The Housewives' Council "Water and Power" Amendment gives an inexperienced board absolute authority to spend fifty-three million dollars from the sale of state bonds, for which all property in the state would be mortgaged. The farmer-taxpayer helps to guarantee the debt, but the Ontario experiment shows who gets the service.

Don't mortgage your property to politics
