These Improvements are Important

There are two general classes of motor car improvements. Those made primarily for their effect on the public—and those made primarily for their effect upon the car.

You will perceive at once that Dodge Brothers new five-bearing crankshaft, two-unit starting and lighting system, air cleaner and other recent improvements, are the sort that represent genuine value.

They are sound and substantial betterments, producing definite and marked results, and as such they are typical of Dodge Brothers methods and product.
