

Fairview School to Give Operetta

"Aunt Drusilla's Garden" is the name of the charming operetta which will be presented Tuesday evening by the children of the upper grades of the Fairview school at the school auditorium. Mrs. Ann Tegart and Mrs. Helen B. Camp are coaching the cast for the play and Miss Beryl King and Miss Leah Bourgeois are in charge of the stage and costume arrangements. Mrs. W. D. Kinder will play the music score of the operetta.

The plot of the play features a poor child Nelda who comes from a large family of poverty in a city tenement. She goes to live with a maiden aunt in a village, but finds it very lonely as she is not allowed to go outside the garden. Nelda invites the school children into her aunt's garden, thereby incurring that lady's displeasure. The boys dislike her so much they promise to get even and steal into the garden for revenge.

While in there one of the boys notices a blaze in the kitchen and in the end the "gang" saves Aunt Drusilla's house from destruction by fire. This serves to mollify that lady's wrath and later there is a happy lawn party with Aunt Drusilla as the grateful hostess. As a happy climax Nelda receives a letter from a rich uncle who insures future happiness for her mother, herself, brothers and sisters.

One of the school rooms has been used for this purpose but it is too small to accommodate the people, especially on nights when the picture shows are given.

Why Firestone GUM-DIPPED TIRES Wear Longer

WE recently were given the tremendous advantage of having the mammoth Firestone factories brought to us. In Tire Educational Meetings we were shown, by means of motion pictures, charts, tire samples and complete engineering data, the details of Firestone tire design and construction—and how Firestone and Oldfield tires and tubes are made in the world's most efficient and economical rubber factories.

Firestone pioneered the original low-pressure tire and made it practical by Gum-Dipping. The motion pictures showed us how the cords of the carcass are dipped in a rubber solution, thoroughly saturating and insulating every fiber of every cord with rubber. Simple demonstrations and tests illustrated the great advantage of this process, which supplies the extra strength to withstand the extra flexing strains of low-pressure construction—one of the reasons why Firestone Gum-Dipped Tires are establishing such unheard-of mileage records.

Low Cash Prices OLDFIELD TIRES

30x3	Fabric.....	\$5.85
30x3 1/2	Fabric.....	6.85
30x3 1/2	Cord.....	7.35
29x4.40	Balloon.....	8.40
32x4	Cord.....	13.40
31x5.25	Balloon.....	15.35
33x6.00	Balloon.....	18.35

Oldfield Tubes are also priced very low. Made in the great economical Firestone factories at Akron and carry the Standard Tire Warranty.

We learned why the Firestone Balloon Tread gives extra safety, comfort and long wear. We were shown why Firestone, from the very beginning, designed and continue to use the round Balloon Tread, minimizing "shoulder breaks", so destructive to tires. Excess rubber at the edges of a Balloon Tread is wasted—actually detrimental to tire mileage. In the Firestone Tread the small units and sharp projections are scientifically placed to permit easy flexing, resulting in extraordinary riding comfort.

Come in and let us put a set of these Gum-Dipped Tires on your car—you can forget about tire trouble. Quality is higher than ever before—prices are lowest in history. Buy now!
