More People Ride on Goodyear Tires Than on Any Other Kind

Four hundred years ago the world was thrilled and awakened by the Great Reformer, Martin Luther. Today, thanks to the great motion picture art, Luther's Life and Time reflected on the silver screen is bringing him again into our midst, living the stormy days of the Reformation, and moral heroism of the highest order born of Christian faith and conviction. This is the most startling, historic reproduction this country has had the privilege of witnessing. This masterpiece is moving like a stupendous avalanche sweeping all before it as it makes its advent into each state. It is sought after by people far and wide. With its clean sweep it is leaving a better understanding of its powerful appeal of God and Truth, and its historical acclamations of the life and inspiring message of the Great Reformer.

Martin Luther nailing the 95 Theses on the university church at Wittenberg, Germany, in 1517, which led to the Great Protestant Reformation.

According to actual figures a million people have viewed the Martin Luther film since it started on its tour late in October, 1925. The universal and unanimous opinion of all has been most gratifying—more than pleased—with the splendid effect and results it has left in each community where presented aside from the educational benefits, the treasury of the various church organizations has been delighted with the financial results.

This sublime eight reel motion picture feature, "Martin Luther, His Life and Time" is the first picture in the history of the cinema industry that has been reserved first run for churches and educational centers. Fabulous offers have been made from the profession for this classic but this special privilege has been held for churches first.

"Martin Luther—His Life and Time"

The greatest educational and religious screen classic ever produced and released. Sweeping the country like wild-fire. Every state in which it has thus far been presented calling for return engagements and tremendous demand for additional bookings.

Firestone GUM-DIPPED TIRES

Firestone Round Tread Balloon

MANY Firestone Dealers are prepared to take in your old tires, offering you a liberal allowance on a new set of Gum-Dipped Balloons.

Firestone Dealers are given the advantages of attending Tire Educational Meetings held throughout the country, where tire design and construction are discussed. The sections of used tires reproduced here are a part of this program. Study these two sections and you, too, will understand what Firestone means by tires built for service and tires made to sell.

Flat Tread Balloon

The balloon tire with heavy, flat tread design is obviously stiffer and rides harder. The excess rubber, placed for appearance at the edges of the tread, is not only wasted but produces hinging action causing ply separation and "shoulder breaks."

Firestone designed and manufactures Oldfield Tires and Tubes, distributing them direct to Firestone Dealers only, through 148 Factory Warehouses. This efficient and economical distribution assures tire buyers everywhere, clean, fresh stocks of Firestone and Oldfield tires in all types and sizes, and has helped to make possible today's remarkably low prices—the lowest in tire history.
