**A Year Ahead—
in style, safety, comfort**

THE Whippet, introduced a year ago, embodied unique features of economy and modern engineering which have not yet been approached in other light cars. In less than eleven months over 100,000 Whippets have been sold.

Whippet is not only the most economical car in America to operate, but the lowest priced with 4-wheel brakes as national standard equipment. Today, with sales climbing faster than ever, Whippet design is still far ahead in its field.

The Landau is a low-swing, colorful car—roomy, comfortable, smart and safe. It appeals particularly to those who demand utmost value, and insist upon being up-to-date. Consider just a few of the Whippet's features:

Four-wheel brakes—Traffic laws will make them compulsory on all cars some day.

Interior roominess—Plenty of room for five. Proving what scientific engineering can accomplish in a less bulky automobile.

Speed—We say 55 miles per hour. Owners say we underestimate it.

Pickup—From 5 to 30 miles an hour in 13 seconds.

Economy—Still the Coast-to-Coast economy record-holder.

Oversize balloons—For extra mileage and increased comfort.

Snubbers—Necessary for genuine light car driving comfort.

Adjustable steering-wheel—Easily fitted to any driver of any size or stature.

Force-feed lubrication—A finer lubricating system, as found on the finer cars.

Silent timing chain—For quieter engine operation.

Full-vision—Narrow front body pillars increase the driving visibility.

Low center of gravity—Gives greater road stability, and the passengers a feeling of greater security.

START the CHILDREN in BUSINESS

Financial experience should be secured as early in life as possible.

Many parents realize this and have started their children in business by investing in a savings account at the

FIRST STATE BANK

This is as truly a business as any other. It pays 4 per cent and the principal is safe. That is more than can be said for many other lines of business.

The matter of giving flags to children as an inducement to start a savings account has met with such success that we have a new supply of flags which will be given, while they last, to each new depositor making a deposit of \$5 or more in the Savings Department.

These flags are 3 x 5 feet with jointed pole, halyards and bracket. On July 1st we paid our savings depositors nearly \$7,500.00.

Was your child among those who received a portion of this interest?

Wouldn't you like to get him interested in an account and started in saving?
