Banking Strength

The pillars and bronze of a bank are after all not its real assets. In its loans and investments lies the true measure of its strength.

A recent audit of the investments of First State Bank as to their true value revealed that fact that the market value of its bonds exceeded by more than \$5,000 the amount at which the bonds were carried on its books.

We select for our customers the same class of investments that we make for ourselves—by so doing we often find it convenient to purchase from our customers when in need of Bonds.

Whether you wish to buy or sell bonds see us. We will let you have the benefit of our experience.
