## The Real Spirit

It is said that Americans are particularly demonstrative toward their national flag and give it especial prominence. It is a National flag and belongs to the whole people, not only collectively but individually, and each citizen feels that it is his flag, while the flags of many other countries are personal flags—flags of the reigning family, or flags of some particular arm of service.

Our national emblem, the "Stars and Stripes" stands for American ideas and ideals—it is the flag of Liberty and Freedom.

In view of the increased demand for flags, the First State Bank has decided to continue for some time the giving of a flag, jointed pole balliards and brackets together with Flag Etiquette to each new depositor in Savings Department opening an account of Five Dollars or more. Through the increase in Savings Deposits the First State Bank has increased its resources to over \$800,000. We will appreciate your account and take pleasure in presenting you a flag.

## Will it Pay to Paint your buildings

You may have asked yourself this question. When you stop to weigh the subject you no doubt decide that *IT WOULD PAY BIG*. Buildings left to the wear of the elements soon deteriorate and decay.

A well painted building is surely an asset. An unpainted building soon becomes a liability. Public Service ready-mixed house paint is a thoroughly dependable paint of proven durability.

The careful and precisely balanced formulae represent the most thorough experiments and weather tests. It is composed of white lead, zinc oxide and pure linseed oil. We do not believe a more durable paint can be made at any cost. *Let us show you how little it will cost you to paint your buildings.*
