

State Dairymen to Meet at Fairview

The State Dairymen's association meeting is to be held this year in conjunction with the Multnomah County Breeders school. The two-day session will be held at Fairview, Oregon. The meetings will be held in the grange hall on February 1 and 2.

association is working with the county agent in preparing a program. The majority of the program will be devoted to the breeding problems in connection with the dairy industry. The greatest source of loss to the dairy industry at the present time is through breeding problems and diseases. There are only a very small percentage of the herds which are not suffering constant losses from these troubles. Some of the best authorities in the United States will be included on the program along with practical breeders who have had a large amount of experience in disease control.

J. Luscher of Fairview is president of the State Dairymen's association and he is working in close cooperation with S. B. Hall, county agent, in making local arrangements.

THE ONLY CAR OF ITS KIND IN THE WORLD

For numberless puzzled motorists Dodge Brothers new Victory Six will simplify the problem of selection, for nowhere in the world is there a car like it. Greater expenditure will not duplicate it. To possess this car's unique advantages you must possess this car.

A Radical Departure in Body Design

In The Victory, for the first time in history, the body sill is eliminated. Body and chassis are built as a single integral unit. Thus, the wide, deep chassis frame of The Victory, now flush with the lines of the body, avoids the customary overhang of a wide body upon a narrow frame; and the chassis itself, rather than the body, supports all weight—body, floor, seats and passengers.

Amazing Results

The results of this construction are astonishing. 330 body parts are eliminated. 175 pounds of superfluous weight are cast off. The all-important CENTER OF GRAVITY is materially lowered. Without the slightest sacrifice of headroom or road-clearance, the over-all height of the car is also lowered—one of the secrets of The Victory's great beauty. The amazing resources of the car's brilliant.

power plant are multiplied still further by perfect distribution and economy of weight.

Power in relation to load is materially increased—pick-up quickened—far greater flexibility achieved.

21 valid miles per gallon at 25 miles per hour is made possible FOR A SIX! Incredible smoothness at high speed is another great gift of this new design!

Elimination of back-wheel "chatter" when the 4-wheel Lockheed-Hydraulic brakes are quickly applied is still another!

And thanks to The Victory's low center of gravity and wide chassis frame, swaying, skidding, tipping—each a factor of weight and its proper and improper placement—are reduced to a new and negligible minimum.

Another New Safety Feature

Yet Dodge Brothers have taken a further revolutionary step to insure the safest motor transportation it is possible to create.

For the first time in automobile history, they have applied the so-called battleship construction to closed car design.

In other words, the body has a double steel shell, locked together, with an air space intervening—is actually TWO bodies, one within the other—yet lighter by 175 pounds—and the safest body known.

Five inches of loose dry snow fell at Government Camp during the night which will render conditions exceptionally good for skiing and tobogganing at the winter play ground the coming Sunday. The road is open as far as Swim and while it is in good condition, it is advisable to put on chains above Rhododendron. The new building erected by the Portland Advertising club for the convenience of the public has now been completed and will be much appreciated as a place to keep warm when not engaging in the sports. The play ground will be open tomorrow night for the usual night sports. The temperature at Government Camp this morning was between 20 and 25 degrees above zero.
