3400 Years Ago—Tut-Ankh-Amen Had His Wealth Buried With Him

For use in the next world

Throughout all those centuries it has been unproductive. Today it is only a hoard for a museum.

If it had been possible for this Egyptian king to put his money to work in a savings bank, and it could have remained until now, his account at this time would be worth more than all the wealth of the United States.

But they did not know that money could be made to work.

How different it is today.

But money, like any other employe, must have a reputable employer, so that the wages, or interest of invested funds, may be regular and certain, and the wealth itself be returned intact to its owner at a given time.

After you have accumulated by means of a Savings Account, carefully selected bonds provide the best method of securing an income and keeping your fortune free from the hazards of the changes wrought by time.

We offer our services to patrons of our Savings Department in assisting them to select sound bonds for investment.

WHY DOES ONE HOUSE STAND OUT?

PAINT makes the difference!

Artistic use of color can make even a modest home distinctive! Beauty, however, is only one measure of paint value. Quality is the important consideration! "Cheap" paints are usually costly in the long run. Fuller Paints are more economical because they go further with less labor, and last longer!

For large jobs, consult a Master Painter. He'll endorse Fuller products: PURE PREPARED PAINT, PHOENIX PURE PAINT, FULLER PORCH and STEP PAINT and PIONEER SHINGLE STAIN. Write for illustrated booklet "Your Home As Others See It."
