Gresham Locals

W. H. Gibson and son Gordon have just installed a milking machine in their modern dairy barn on South Roberts avenue, making their plant one of the most up-to-date dairies in this vicinity. This machine makes it possible to milk the herd of 29 cows in about 60 minutes. Milk produced in this way must be as nearly pure as is possible to get it. The cows' udders are washed in clean water, then the teat cups attached and the pail sealed in vacuum, thus assuring absolutely clean milk. They sell their whole output, about 200 quarts, in Gresham. This firm is endeavoring to furnish milk in the most sanitary way possible.

Household Hints

What shall we have—for evening refreshments? After all is said and done the refreshments you know are the most important part of the party.

When figuring out "what to have" we must always try to hit upon something that is pretty sure to be liked by everyone of the guests. An assortment of dainty sandwiches, a nice chicken salad and ice cream for dessert are usually safe bets and always good. But sometimes it is such a satisfaction to be "different" and surprise guests once and awhile.

Evening suppers aren't like teas or even bridge luncheons where you have to pay more or less attention to customs. These late suppers at home are always informal and so you can serve whatever will be tasty and pleasing. Whatever the dish it should be hot to the touch for goodness—well seasoned, hot if it is supposed to be hot and just "off the ice" if it is supposed to be cold.

Creamed chicken or Lobster Newberg can be kept hot in a chafing dish or in a double boiler on the back of the stove until ready to serve. When serving little hot biscuits it is much better to bake them just before serving than to try to warm them up. You can do this if you make the biscuits up early in the evening, put them into the refrigerator. Then put them into a hot oven about fifteen minutes before you want to serve the lunch.

A hot dish, or sandwiches, or a salad—and a dessert with a beverage will always fill the bill. You don't need to serve everything in the following menus—but they are arranged to fit big parties and little ones.

(1) Chicken salad, hot biscuits and butter, layer cake or lemon cream pie, coffee.

(2) Lobster Newberg or Creamed Tuna, bread and butter sandwiches, stuffed celery, sherbet or ice cream, cookies, coffee.

(3) Especially for young peoples high school parties, (a) Waffles (served with creamed chicken), stuffed olives, devils food cake, tutti-frutti ice cream, chocolate.

(b) Assorted sandwiches, potato salad, old fashioned strawberry shortcakes (served warm), chocolate.

Drifted Snow Waffles
(Makes 4 to 5 waffles)
2 cups Sperry's Drifted Snow flour, 4 teaspoons baking powder, 1 teaspoon sugar, 2 eggs, ½ teaspoon salt (only if you use unsalted shortening instead of butter), 1½ cups milk, 4 tablespoons melted shortening.

Measure sifted flour, add baking powder, sugar and salt twice. Beat eggs and add milk.

Add flour (gradually) beating it in with the egg beater at first to prevent "lumping." Then add melted shortening cooled until lukewarm and beat for one minute to blend ingredients well. Dip 3 or 4 tablespoons of batter into center of hot waffle iron (or for convenience put batter into a pitcher and pour onto waffle iron). A waffle should bake in two minutes if the waffle iron is right.

If a question occurs to you about the making of any of the dishes in these menus just take a scrap of paper and drop me a line. I'll be glad to tell just how they are made. Address—Martha Meade, Home Service Bureau, Sperry Flour Co., San Francisco.
